TaskArrowSm.tiff ↗ Datagloves are very popular for cyberspace applications.

935307_TaskArrowSm.tiff ↗ They might be used for scientific apps too. Replacing the mouse systems there.

- **PowerGlove**

- a simple and cheap glove. Used for games.
 - by Nintendo - Mattel

- **other gloves**

- professional, most of them used in research departments
 - by VPL??

685266_CheckMark.tiff ↗ Because datagloves are very similar in their way of working it should be easy to create a common API. But I would like to see more device manuals !
