

Release notes

(UNIX-Haters Tool v0.11)

438886_paste.tiff ↗

TaskArrowSm.tiff ↗ Here is a partial list of the features this application has. 229874_TaskArrowSm.tiff ↗ This was designed to keep me from hacking those ever returning UNIX level commands I tend to type every day.

291955_PixelRule.tiff ↗

220329_CheckMark.tiff ↗ Provides a simple interface to..at least my..every day tasks:

- uucico (poll-site can be specified since 0.11)
- uustat
- newsrun
- sendbatches
- ps
- kill
- df
- pppup, pppdown
- showing certain log files.

613165_CheckMark.tiff ↗ To be able to use all the features this app either has to be run by root or setuid to root (see the bugs section for details).

383442_CheckMark.tiff ↗ Most useful for single machine sites because big sites let cron do the nasty work and mostly have all the fancy Internet stuff.

796245_CheckMark.tiff ↗ Supports extended App.info for yet to

come Workspace inspectors.

187441_CheckMark.tiff ↗ Should not crash. SimpleSmiley.tiff ↗

53781_PixelRule.tiff ↗
