

MiscBackWindowDelegate

Adopted By:

Declared In: misckit/MiscBackWindowDelegate.h

Protocol Description

MiscBackWindowDelegate Protocol is implemented by an object that wishes to receive delegate messages from a MiscBackWindow.

Method Types

Delegate Messages - windowDidChangeTierTo:

Instance Methods

windowDidChangeTierTo:

- **windowDidChangeTierTo:(int)*tier***

Received by a MiscBackWindow delegate when the window changes tier. Objects can use this so that special measures can be taken to allow for recovery of control if the window is placed in a very high tier. Returns **self**.
