MiscKit Authors

This file details the authors of the MiscKit.   Changes to a portion of the MiscKit should be forwarded to the appropriate author/manager, as listed.   (To the manager, if one exists, otherwise to the author.)   For history's sake, those who have contributed code are also listed.   The information is presented below as follows:

Resource: (object, palette, documentation, app, whatever this includes)
  a: original author, e-mail address
  o: owner (copyright holder), e-mail address
  m: manager (send changes, bug reports, and suggestions here), e-mail address
  c: contributors (one per line, if any), e-mail address

In cases where the a, o, or m fields are the same person, you will see a line like this:

     a, o, m: person, e-mail

Multiple maintainers are also possible, like this, though such arrangements are discouraged:

     m: person, e-mail (object)
     m: person, e-mail (palette)
     m: person, e-mail (documentation)

If you have general comments about the MiscKit, or would like to recommend a resource (object, app, utility, whatever) to add to the MiscKit, contact the MiscKit mailing list at misckit@byu.edu.   To get on or off the list, contact the list maintainer at misckit-request@byu.edu.   For special concerns, contact the MiscKit administrator (moderator), Don Yacktman, at yackd@xmission.com.

Author Listing

MiscKit;¬MiscKit top level: organization, README and other random explanatory documentation, makefiles
a, o, m: Don Yacktman, don@misckit.com
c: Mike Ferris, mike@lorax.com

Note: Makefiles loosely derived from NeXT internal Makefiles as found in the CCRMA MusicKit source code distribution

AutoDoc;¬AutoDoc: example script
  a, o, m: Adam Swift, aswift@its.com
  c: Todd Anthony Nathan, todd@icebox.com
  c: Bill Bumgarner, bbum@friday.com
  c: Kim Shrier, kim@media.com

BPM;¬BPM: example app
  a, o, m: Don Yacktman, don@misckit.com

cnvwrap;¬cnvwrap: example app
  a, o, m: Carl Lindberg, lindberg@csnext.colgate.edu
  c: Don Yacktman, don@misckit.com

FileBrowser;¬FileBrowser: object, example app
  a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

FileSearchTest;¬FileSearchTest: object, example app
        a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

format_comment;¬ format_comment: example script
        a, o, m: Bill Bumgarner, bbum@friday.com
        c: K. Lo Shih, lo@apdg.com

FREE.h;¬FREE.h: macros
        a, o, m: Raf Schietekat, RfSchtkt@maze.ruca.ua.ac.be

generate-makefile;¬generate-makefile: utility program
        a, o, m: Darcy Brockbank, samurai@amber.hasc.ca

getset;¬getset: Perl script
        a, o, m: Mark Onyschuk, Mark_Onyschuk@NeXT.COM

IBMole;¬IBMole: palette, examples
        a, o, m: Montgomery Zukowski, monty@intuitiveedge.com
        c: Art Isbell, art@cubicsol.com

IconTester;¬IconTester:　example
　　　　　　a, o, m:　Craig Laurent, t641@revco.com

image2m;¬image2m:　palette, examples
　　　　　　a, o, m:　Mark Onyschuk, Mark_Onyschuk@NeXT.COM

language.make;¬language.make:　makefile extension
　　　　　　a, o, m:　Stephan Wacker, stephan@rodion.muc.de

LazyScrollDir;¬LazyScrollDir:　example app
　　　　　　a, o, m:　Eric Sunshine, sunshine@mcgh.org
　　　　　　a, o:　Paul S. McCarthy, zarnuk@mcgh.org

list-misc;¬list-misc:　Perl script
　　　　　　a, o, m:　Bill Bumgarner, bbum@friday.com

MiscAbstraction;¬MiscAbstraction:　object
　　　　　　a, o, m:　Michael T. H. Scott, mths@longshot.demon.co.uk

MiscAnnouncer;¬MiscAnnouncer: object
  a, o, m: H. Scott Roy , hsr@CS.Stanford.EDU

MiscAppDefaults;¬MiscAppDefaults: category
  a, o: Steve Hayman, shayman@objectario.com
  c, m: Don Yacktman, don@misckit.com

ExtendedApp;¬MiscAppExtensions: category, documentation
  a, o, m: Don Yacktman, don@misckit.com
  c: Steve Hayman, shayman@objectario.com
  c: John Karabaic, John_Karabaic@NeXT.com
  c: Thomas Engel, tomi@shinto.nbg.sub.org

MiscAppFile;¬MiscAppFile: object, example app
  a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

MiscAppIcon;¬MiscAppIcon: Application category
  a, o, m: Sean Luke, seanl@cs.UMD.EDU

MiscAppIconAnimator;¬MiscAppIconAnimator: object
        a, o, m: Craig Laurent, t641@revco.com

MiscArrowButton;¬MiscArrowButton: object, palette
        a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

MiscBackWindow;¬MiscBackWindow: object
        a, o, m: Dale Amon, amon@music.qub.ac.uk

MiscBase;¬MiscBase: macros, constants
        a, o: Drew Davidson, drew@its.com
        c, m: Don Yacktman, don@misckit.com

MiscBundleLoader;¬MiscBundleLoader: category, documentation
        a, o: Mike Ferris, mike@lorax.com (category)
        a, c, m: Don Yacktman, don@misckit.com (docs)

MiscCalendarView;¬MiscCalendarView: object, palette, documentation

a, o, m: Jon Kutemeier, jkute@fnbc.com

MiscCircularSlider;¬MiscCircularSlider: object, palette
a, o, m: Don Yacktman, don@misckit.com
a, o: Vince DeMarco, vince@whatnxt.cuc.ab.ca
c: Carl Lindberg, lindberg@csnext.colgate.edu
c: Laurent Daudelin, laurent@planon.qc.ca

MiscClassDecoder;¬MiscClassDecoder: palette, bundle, example
a, o, m: Stephan Wacker, stephan@rodion.muc.de

MiscClassVariable;¬MiscClassVariable: object, documentation
a, o: Mike Ferris, mike@lorax.com
c, m: Don Yacktman, don@misckit.com

MiscClipTextPalette;¬MiscClipTextPalette: palette, objects
a, o, m: Balazs Pataki, pataki@next-1b.manuf.bme.hu
c: Don Yacktman, don@misckit.com

MiscClockView;¬MiscClockView: object, IB Palette, PB subproj, documentation
         a, o, m: Scott Anguish, sanguish@digifix.com
         c: Don Yacktman, don@misckit.com
         c: Stan Jirman, stan@atlantis104.Stanford.EDU
         c: Constantin Szallies, tini@gurke.ping.de

MiscColor;¬MiscColor: Object
         a, o, m: Don Yacktman, don@misckit.com

MiscColorView;¬MiscColorView: palletized object
         a, o, m: Thomas Engel, tomi@shinto.nbg.sub.org

MiscColorWells;¬MiscColorWells: Palette
         a, o: Morgan D. Wise, wisem@statnextm.lakes.trenton.sc.us
         c, m: Don Yacktman, don@misckit.com
         c: Michael T. H. Scott, mths@longshot.demon.co.uk

MiscCoolButtons;¬MiscCoolButtons: IB palette
         a, o, m: Don Yacktman, don@misckit.com

      c: Sean Luke, seanl@cs.umd.edu
      c: Carl Lindberg, lindberg@csnext.colgate.edu

Miscdaemon;¬Miscdaemon: functions
      a, o, m: Christopher J. Kane, ckane@next.com

MiscDateView;¬MiscDateView: object, palette, documentation
      a, o, m: Hugh Ashton, hugh@furuike.twics.com
      c: Rod Ragner, rragner@stallion.vm.iastate.edu

MiscDependency;¬MiscDependency: protocol
      a, o, m: H. Scott Roy , hsr@CS.Stanford.EDU

MiscDictionary;¬MiscDictionary: object
      a, o, m: Don Yacktman, don@misckit.com

MiscDirectory;¬ MiscDirectory: object
      a: Simson L. Garfinkel, simsong@pleasant.cambridge.ma.us (original)
      a, o, m: Georg Tuparev, tuparev@EMBL-Heidelberg.DE

MiscDirectoryStream;¬_MiscDirectoryStream: object, example app
             a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

MiscDistributor;¬MiscDistributor: object, documentation, example app (see
     MiscTee ;Authors.rtf;MiscTee;¬)
             a, o, m: Don Yacktman, don@misckit.com

MiscDocManager;¬MiscDocManager: object, documentation, example app
             a, o: Mike Ferris, mike@lorax.com
             c, m: Don Yacktman, don@misckit.com

MiscDocType;¬MiscDocType: object, documentation, example app
             a, o: Mike Ferris, mike@lorax.com
             c, m: Don Yacktman, don@misckit.com

MiscDocument;¬MiscDocument: object, documentation, example app
             a, o: Mike Ferris, mike@lorax.com
             c, m: Don Yacktman, don@misckit.com

MiscDragViews;¬MiscDragViews: objects, palette
- a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com
- c: Don Yacktman, don@misckit.com (Image resizing)
- c: Bruce McKenzie, bruce@trwlasd.com (bug fixes, archiving)

a, o, m: Thomas Engel, tomi@shinto.nbg.sub.org or
tsengel@cip.informatik.uni-erlangen.de
c: Don Yacktman, don@misckit.com (Misc-ized, first aid->finger)
c: Steve Hayman, shayman@Objectario.com (some shell scripts)

UsersAndGroups;¬UsersAndGroups: Example app (uses MiscUser, MiscUserGroup classes)
a, o, m: Robert Todd Thomas, Todd_Thomas@fnbc.com

TempFolder;¬In Temp folder, works in

progress

 Many of these objects need to have names changed and details worked out before they can be integrated with the rest of the kit.   As this is done, they will migrate to the standard locations.   They are here (with the author's permission) so that you can see where things are headed, and in an emergency, make use of the items here now, even though they aren't fully integrated and are subject to change in interface, etc.   (The administrator also has a private Temp directory for other submissions that are pending; it tends to be 3-4 times the size of the Temp directory on average.   Thos submissions have been held back at the author's request.)

DataStructures;¬DataStructures: objects
        a, o, m: Don Yacktman, don@misckit.com (PriorityQueue)
        a, o, m: Doug McClure, ets!dougm@uunet.UU.NET (MiscPriorityQueue)
       Note: Well, we've already got a priority queue, but here are two other
           contenders.   We have to figure out how to combine them into
           something a bit more useful.   I think Doug's queue is perhaps a better
           approach to use, with its inheritance heirearchy, but Mark's queue has

the method to combine queues, which is handy.   Also, my queue's ability to allow the object to provide its own priority should be implemented in a category of Doug's queue (which is in fact possible to do).   Also, a dynamic subclass of Doug's queue which allows objects in the queue to change their priority on the fly would be nice.

MiscClockViewExtensions;¬MiscClockViewExtensions: object
      a, o, m: Jesse Tayler, jtayler@tmade.com
     Note: Adds the ability to set a MiscClockView with a NSDate (and hence using EOF).   [This isn't in the kit proper yet because we need to integrate it in such a way that those without EOF won't run into troubles. If you have EOF and need this functionality, just copy the source into your project for now.   I'll eventually create a new library for all EOF extensions.   --Don]

MiscCompletionText;¬MiscCompletionText: object
      a, o, m: Thomas Engel, tomi@shinto.nbg.sub.org
     Note: We could probably add this right now, but I wanted to give it time to mature, especially since this will likely be combined with the

MiscEmacsText that is brewing behind the scenes...

MiscPickList;¬MiscPickList: objects, test app
        a, o, m: Don Yacktman, don@misckit.com
       Note: This implements a ªchooserº GUI which pops up a window with a
             scrolling list of choices which may be entered into a text field.   The
             advantage of this over a pop-up button is that the user can enter in text
             that is not in the list and they can dynamically add or modify list entries.
             This wasn't finished in time for the release, but does work.   The final
             version will be palettized and attached to a TextField (comes up
             automatically when the field is accessed) and a button, hopefully
             without the need for the controller class in between.

MiscSerialPort2;¬MiscSerialPort2:   object
        a, o, m: Arnaud Meuret
       Note: This is a major overhaul of Matt Brandt's object; not yet done, but open
             for comments, etc.

MiscTimeAdditions;¬MiscTimeAdditions: contributions

Time_Stuff   a, o, m: David Lehn, dlehn@vt.edu
Note: This will be folded into MiscTime (in the future) as a contribution.
getdate.y   a, o, m: public domain, Steven M. Bellovin
           (smb@research.att.com), Rich $alz (rsalz@bbn.com), and Jim Berets
           (jberets@bbn.com)
Note: This code, as it is public domain, will not fall under MiscKit license, but
        will be folded into the MiscTime object to allow for parsing/pretty
        printing, etc. in the future.   Submitted by Mark Onyschuk along with the
        PriorityQueue.

NetImageFilter;¬NetImageFilter: example of NEXTSTEP filter services (images)
        a, o, m: Marco Scheurer, marco@sentenext1.epfl.ch
        c: Bill Bumgarner, bbum@friday.com
        Note: This requires the netpbm utilities to function.   It supports the
             conversions that they support.   This is still a work in progress.

ObjCategories.rtf;¬ObjCategories.rtf: category
        a, o, m: John Karabaic, John_Karabaic@next.com
        Note: Host picker method¼ (I think I'll do something like the MiscValueField

to tie a textfiled and a button together to create a MiscHostField object. Comments?   I think that this would be nice to use in conjunction with the MiscRemoteSubprocess...   -don)

QuickProject;¬QuickProject: app
a, o, m: Steve Hayman, shayman@Objectario.com
Note: The feature set for this app is nowhere near nailed down, but it is useful as-is.   Please send in input as to what features you think might be useful.

Text_more;¬Text_more: category (Text object)
a, o, m: Thomas Engel, tomi@shinto.nbg.sub.org
Note: Untested as of yet; adds cut/copy/paste of arbitrary pasteboards.

UniqueInstance;¬UniqueInstance: object
a, o, m: Michael T. H. Scott, mths@longshot.mpn.com
Note: Note from Michael: In order to be able to include an abstraction type object in nib files what one really needs is a UniqueInstance.   No matter where, or how often it appears, its always the same object.   As

you can see these [MiscAbstraction and this object. -- don] are not finished submissions.   I intend to to ask the list for its opinion first. What particularly puzzles me is why doesn't IB call alloc?   It would simplify matters if it did.
