MiscTree (Browser)

Declared In: <misckit/MiscTree.Browser.h>

Category Description

This category methods to the MiscTree class to allow a tree to be a delegate of a NXBrowser.   By default the type of browser support is a normal browser.   Currently the path separator is "/" and cannot configure itself from the NXBrowser's path separator. Many of the methods are named inaccurately for what they do.

Because this category implements **browser:fillMatrix:inColumn:** it is impossible to create a very lazy NXBrowser delegate from a MiscTree.

Method Types

Querying the browser   - returnSelectedNode:
                                      ± returnSelectedPath:

Finding Children	± pathToChild:
	± pathToChild:level:
Browser Delegate Methods	- browser:fillMatrix:inColumn:
Misceal	± labelString

Instance Methods

becomeClass;¬browser:fillMatrix:inColumn:
　±　(int)**browser:***sender* **fillMatrix:***matrix* **inColumn:**(int)*column*

This is the browser delegate method that is sent to a MiscTree node by an instance of NXBrowser. This implements a normal browser.

See also:　± browser:fillMatrix:inColumn: (NXBrowser)

compare;¬labelString
　±　**labelString**

Returns the a MiscString object that contains the label for the node.　This method should probably be in another category of MiscTree that contains more support for MiscString's.

See also:　± label (MiscTree)

instanceSize;¬pathToChild:
　±　**pathToChild:***thePath*

Returns a MiscTree instance that exists at the path designated by the MiscString *thePath*. The path

separator for the NXBrowser must be '/'.

See also: ± **pathToChild:level:**

sizeOf;¬pathToChild:level:
   ± **pathToChild:**_thePath_ **level:**(int)_theLevel_

Returns a MiscTree instance at the path specified by the MiscString _thePath_, starting at _theLevel_ deep in the MiscTree structure. The path separator for the NXBrowser must be '/'.

See also: ± **pathToChild:**

sizeOf;¬returnSelectedNode:
   ± **returnSelectedNode:**_theBrowser_

Returns a MiscTree instance at the path specified by the MiscString _thePath_.

See also: ± **pathToChild:**

sizeOf;¬returnSelectedPath:
   ± **returnSelectedPath:**_theBrowser_

Returns a MiscTree instance at the path specified by the MiscString _thePath_.

See also: ± **pathToChild:**
