MiscRemoteApplication

Inherits From: Object

Conforms To: NXSenderIsInvalid

Declared In: misckit/MiscRemoteApplication.h

Class Description

The MiscRemoteApplication class encapsulates the process of launching and communicating with another application.

Instance Variables

const **char*portName**;
const **char*appName**;
const **char*appPath**;

```
id proxy;
id connection;
id protocol;
id delegate;
int retryCount;
int retrySeconds;
BOOL debug;
```

char*portName	No description.
char*appName	No description.
char*appPath	No description.
proxy	No description.
connection	No description.
protocol	No description.
delegate	No description.
retryCount	No description.
retrySeconds	No description.
debug	No description.

Method Types

- connection
+ debug
- delegate
- free
- initAppName:portName:
+ initialize
- protocol
- read:
- retries
- retryInterval
- run
+ setDebug:
- setDelegate:
+ setPath:
- setProtocol:
- setRetries:
- setRetryInterval:
- unconnect
- write:

Class Methods

debug
+ (BOOL)**debug**

No description.

Instance Methods

connection
    - **connection**

No description.

See also:

delegate
- **delegate**

No description.

See also:

free
- **free**

No description.

See also:

initAppName:portName:
- **initAppName:**(const char*)*app*
  portName:(const char*)*port*

No description.

See also:

protocol
- **protocol**

No description.

See also:

read:
 - **read:**(NXTypedStream *)*stream*

No description.

See also:

retries
 - (int)**retries**

No description.

See also:

retryInterval
 - (int)**retryInterval**

No description.

See also:

run
 - **run**

No description.

See also:

setDelegate:
 - **setDelegate:** *anObject*

No description.

See also:

setProtocol:
 - **setProtocol:** *aProtocol*

No description.

See also:

setRetries:
 - **setRetries:**(int)*n*

No description.

See also:

setRetryInterval:
 - **setRetryInterval:**(int)*n*

No description.

See also:

unconnect
- **unconnect**

No description.

See also:

write:
- **write:**(NXTypedStream *)*stream*

No description.
