

# FontChoice

## Description

The FontChoice component is a ready-made RadioMatrix that is intended to allow the user to choose one of the 7 HTML font sizes. As it is merely a RadioMatrix initialized with 7 radio buttons, most of the usual RadioMatrix options are available.

—

### **matrixName**

Used to distinguish the WORadioButtons used in this RadioMatrix from those in any other RadioMatrix.

### **selectedItem**

If initialized, indicates which button is initially selected. Upon return, indicates the user's choice (or **nil** if nothing is chosen). Default is item 3.

### **borderSize**

The width of the border of the matrix. Default is 1.

### **isVertical**

The orientation of the matrix. Default is NO.
