Bandwidth Monitor Configuration Wizard

Welcome to Bandwidth Monitor's Configuration Wizard.
This wizard will guide you through the steps of configuring the most useful features of this software.

Contents:
  - Adapter (network interface) selection
  - Preferences
  - Periodic reset
  - Finished

Adapter Selection

This dialog lets you choose which adapter (also referred to as a network interface) you wish to monitor.

Bandwidth Monitor displays all found adapters in the list. Simply select the adapter you wish to monitor (it will become selected), and press "Next" to go to the next step.

Preferences

This panel of the Configuration Wizard lets you choose some of the preferences for Bandwidth Monitor:

- Autostart Bandwidth Monitor when I log in
  Select this option if you wish Bandwidth Monitor is started each time you start your computer and log-in windows.
  Default : Yes

- Show Bandwidth Monitor window at startup
  If this option is selected, the Bandwidth Monitor will be shown when you log-in your computer. If if its unselected, the window will be hidden automatically.
  Default : No

- Bandwidth Monitor is Always On Top
  Select this option if you wish Bandwidth Monitor window to be above all other windows. Being Always On Top means it will not be hidden by other overlapping windows.
  Default : No

- Color scheme
  The Bandwidth Monitor window can be set to use several color schemes : Orange, Green, Silver and Blue.
  Default : Orange

- Language selection
  This option is used to select the language used by the software.

Periodic reset

Many internet service providers (ISP) will limit their clients on the amount of information they can send and receive. These limits may vary with each ISP, and are usually on Upload, Download and/or Total amounts.

Most ISPs will reset these amounts when the bill is being sent. In order to reflect these, Bandwidth Monitor may periodically reset the Received/Sent/Total amounts.

For example, if you are billed monthly on the 15th, you should enable "Reset statistics periodically", select a "monthly" reset, on day "15".

Finished

The Configuration Wizard is done configuring the basic features of Bandwidth Monitor. Click "Finish" to save these preferences, or "Cancel" to abort.

More options may be set in the "Settings" dialog of Bandwidth Monitor. To access this dialog, right-click the Bandwidth Monitor window or tray icon, and select "Settings".
