**Welcome to MyWanIP**

MyWanIp is a Windows 95,98, ME, NT and Windows 2000 utility that allows you to discover your WAN IP address. Many home and small business users have broadband routers like the Linksys Etherfast Cable/DSL Router, Netgear RT Series, Umax Ugate Series and others between their LAN and their Internet connection.   When a LAN PC is connected behind one of these routers, most IP Address utilities will only tell you the LAN IP address.   This is not useful to someone trying to connect to your router or your computer from the Internet.   MyWanIP always displays the proper WAN IP Address – the TRUE IP address needed to connect to any PC on the LAN.

MyWanIP uses remote servers to determine the Cable/DSL router's true WAN IP address, and shows that IP address in a small window.   This allows you to determine the IP address that someone else needs to connect to your computer over the Internet. You can also COPY the displayed IP address into the clipboard for use in an email message.

When you install MyWanIP it's loaded in your startup folder by default, and it runs each time you reboot your PC.   In order to see the IP address, you should right or left-click the IP icon in your system tray.

About Tzolkin Corporation

Located just outside of Boston, in Pepperell, Massachusetts, the Tzolkin Corporation is a leader in Dynamic DNS technology aimed at the home and small business user.   The company assists home and business Internet users in getting a domain name for their home computer, even if they have a Dynamic IP address.   Tzolkin corporation offers many flexible Dynamic DNS, Domain and Mail hosting services that allows the home or small business user to get more from their Internet connection. All other product names mentioned are used for identification purposes only and may be trademarks of their respective companies. Registered and unregistered trademarks used herein are the property of their respective owners. The Tzolkin Corporation warrants to Registered Users only that its software will be free from defects and faulty workmanship for a period of ninety (90) days from the date on which the Registered User downloaded the software. If a defect occurs within ninety (90) days of downloading the software, the Registered User may contact Tzolkin to receive replacement software. This warranty to Registered Users is limited to replacement and does not encompass any other damages, including but not limited to loss of profit, and special, incidental, or other similar claims.

The Tzolkin Corporation's software is provided on "as is" basis. Except for the express warranty set forth above, Tzolkin Corporation makes no other warranties, either express or implied, regarding the software's quality, performance, merchantability, or fitness for a particular purpose. The Tzolkin Corporation does not warrant that its software or service will meet your requirements or that the operation of the service will be uninterrupted or error free. Tzolkin Corporation is not responsible for any problems or damage caused by either the software or the service that may result from using the software or the service; whether by a Registered User or unregistered user. The user of Tzolkin software or services agrees to hold the Tzolkin Corporation and/or any persons associated with the creation, sales, marketing, or support of its software or service harmless for any problems arising from the sales, marketing, support or use of the software or service.

The Tzolkin Corporation exercises no control over the content or legality of information passing through our systems. The Tzolkin Corporation retains the right to discontinue services to any user that we, at our sole discretion, deem to be using our services in violation of ethical conduct codes of the Internet. This includes Unsolicited e-mail or SPAM, as well as hosting Warez or FTP sites with illegally Pirated Software or illegal content.

The Tzolkin Corporation offers these services as another option to your ISP's Services. These services may conflict with your providers TOS (Terms Of Service) agreement, and you should check with your ISP or Internet provider before doing anything that may violate your agreement with them. By no means is Tzolkin Corporation advocating that you violate your service agreement with your Internet service provider

Can I BUY or Upgrade MyWanIP?

No you can't buy it because we give it away for free.   From time-to-time we may add other features to it and you might check out **http://www.mywanip.com**   to see if we've made any changes.

We also have **TZO.COM**.   This is a Dynamic DNS subscription service that allows you to host your domain on your own server and have your dynamic or static IP address updated automatically within the Internet Domain Name System.   You can have a name rather than a number for your domain for as little as $2 a month.   TZO offers many more features than MyWanIP, and can be purchased at a very low cost for a 1 year subscription. Please see **http://www.tzo.com** for more information and pricing.

How to uninstall the MyWanIP software

The MyWanIP program can be uninstalled simply and easily by using ADD/REMOVE Programs under the Windows 95, 98, ME, or NT/2000 Control Panel.   Click on the MyWanIP program and then Click ADD/REMOVE to remove the MyWanIP program from your computer.   Please Note that you should stop the software before removing it.   You can do this by clicking FILE, EXIT in the MyWanIP program.

How can I tell if MyWanIP is running?

The MyWanIP utility runs in the system tray when minimized, and when you click on the icon in the system tray, this will launch the user interface, and show you the WAN IP address of your Internet connection.   See the screenshot below that shows the icon to launch the application, and the tray icon that appears in the system tray

The Icon to launch the MyWanIP utility, located in the STARTUP folder by default
