getCount:(unsigned int *)count andPostings:(IXPosting **)thePostings

Returns by reference the number of postings, and a copy of the postings sorted by handle. The sender of this message is responsible for freeing the postings when they are no longer needed. Returns self.

setCount:(unsigned int)count andPostings:(IXPosting *)postings

Sets the number of postings to count, and installs a copy of the contents of postings into the receiver. The sender of this message is responsible for freeing the postings when they are no longer needed. (Note: IXPostingCursor frees its postings.) Returns self.
