Chapter 1

GUIEnvExample

1.1 GUIEnvExample

The menu help guide for the GuideExample program.

This guide is shown if the user presses the help key over a menu item.

1.2 Project

The project menu has some very useful general functions:

About : About the program

Quit : Quit it. (You don't really need this...)

1.3 About

About shows a very interesting text about the program.

1.4 Quit

A very unnecessary function which allows you to quit illegally the program.

1.5 Help

With the Help menu you can get some help about some very important topics.

1.6 GUIEnvironment

Choose GUIEnvironment and you will see what this item does...

1.7 Amiga

Still the best computer, so don't wonder what you will see...
