1.3 Multimedia Toolkit

Multimedia Toolkit

Over 10,000 files for the Amiga and IBM PC

CONTENTS:-

500 Original 24 Bit Images with Ham8 & Ham Int. Versions

1308 Colour Clip Art
2139 Mono Clip Art
93 Scaleable Clips

195 Standard Fonts
120 Coloured Fonts
107 Adobe Fonts
80 Postscript Fonts
79 Compugraphic Fonts

750 Music Modules

2300 Samples

& Utilities to view and listen to files.

For use in Paint Packages, Desktop Publishing, Desktop Video, Games Writing, Multimedia Presentations and almost any Graphical or Musical application.

1.4 Network CD

Network CD

At last a low cost solution to networking a CD32 or CDTV to another Amiga. With the introduction of Network CD by Weird Science it is now possible to set up a Sernet link between the CD32 and an Amiga or a Parnet link between the CDTV and an Amiga. The CD is configured to provide a Workbench environment allowing the transfer of data from CD's to a master machine. The automatic reset feature has been disabled allowing the user to change the CD in the either the CDTV or the CD32, providing access to the vast range of data available on the CD market.

The CD on boot up auto configures to the correct operating system and in addition provides communications software in the form of Term, Twin Express and NComm. Also included are a couple of CLI only high speed transfer programs capable of a baud rate of 115,200. In all over 36,000 files are included on the CD. To add extra value we have included the following: PD PhotoCD software with GUI for ease of use, the latest batch of Fred Fish and Amos PD disks (Fred Fish 801 - 975 & Amos PD 478 - 603), 74 Utility disks, approximately 500 images in 256 colours and a whole host more.

To accompany the CD we have also manufactured a cable and interface to join the AUX (keyboard) port on the CD32 to the serial port on an Amiga. This includes a keyboard pass through to enable the use of keyboards with the CD32. The cable is over a meter in length and enables the CD32 to act as a disk drive on a normal Amiga 500, 1500, 2000, 3000, 1200, 4000. CDTV requires a Parnet cable to utilise the faster Parnet networking software. We can also supply Parnet cables or Null modem cables. All of our cables come with software on floppy to configure the master Amiga and enable a fast setup.

Prices for these products are:-

Network CD £ 14.99 Sernet (CD32) Cable £ 19.95 Parnet Cable £ 9.99

The CD32 gets serious with Network CD

1.5 Amos PD CD

Amos PD Compact Disc

The Official Amos PD Library Compact Disc

NOW in RELEASE 2

=====

Details:

Amos, Amos Pro and Easy Amos have been available for many years and have long been recognised as being an easy access to programming the Amiga, with features beyond all but the seasoned programmer.

The publisher, Europress have sold thousands of copies. The major Amiga magazines have given away tens of thousands of copies on cover disks. Now at last Weird Science is pleased to announce the most comprehensive collection in the world to date of source code for Amos programmers. In co-operation

with the Official Amos PD Library we have placed the entire library on CD, made it accessible with Workbench and networking tools and wrapped the whole package up attractively for only £ 19.95.

Contents:

- Every Disk in the Amos PD Library (to 638)
- Every Disk in the Amos General PD Library (to 250)
- First 12 issues of Totally Amos Disk Magazine

Statistics:

- 650 megabytes (= 800+ floppies)
- 1600+ Amos Source Code files
- 100 Sprite Banks
- 250 CText Banks
- 350 Music Banks
- 800 Samples
- Extensions

And a whole host more

1.6 Clip Art CD

The latest additions to Weird Science CD Rom collections have arrived. As a follow up to Network CD, which gives a Workbench and Networking tools to join a CDTV or CD32 to another Amiga, we have produced the first three titles in a series of Data CD Roms for both the Amiga and the IBM PC. Each CD is non-bootable aimed at a specific subject and each has between 500 and 650 megs of data stored in easy to access directories sorted by format.

Clip Art CD

The most comprehensive collection of Clip Art ever for the Amiga range of the coputers. In total over 26,000 files. The following formats are catered for, B&W Iff bitmaps, coloured Iff bitmaps, Proclips, EPS, Pagesetter, Pagestream, IMG, Corel Draw and coloured brushes for use in Deluxe Paint etc. This CD along with others is also PC compatible.

Fonts CD

A complete CD dedicated to Fonts for the Amiga range of computers. Also PC compatible. The following formats are catered for, Adobe, CG Fonts, Coloured, Postscript, Prodraw, IFF, PCX, Pagestream, Truetype, Calamus and GDOS. Adding up to the most complete CD of Fonts for the Amiga ever. In total over 18,000 files in 900 directories.

Sounds Terrific (Double CD)

A double CD pack containing over 1.2 Gigabytes of musical and sounds data for the Amiga and IBM PC compatible computers. The contents include Modules, Sonix Scores, Midi Files, Samples in RAW, IFF, WAV & VOC formats and utilities for both the Amiga and the PC. The utilities even give access to all the samples on both the PC and Amiga, although they may have originated on the other platform. This all adds up to the most complete collection of

sounds on any platform and will form a vital part of any musicians CD collection.

Clip Art and Fonts are £ 9.99 each and Sounds Terrific is £ 19.95

1.7 Weird Science Cables

Sernet Cable

This joins the CD32 to an Amiga. It includes a keyboard pass through to allow the connection of a keyboard. The cable connects to the AUX port of the CD32 and the Serial port of the Amiga. The cable includes the necessary interface to convert the signals to allow the two machines to communicate. The cable will also emulate a null modem lead allowing the transfer of data with comms packages as well as the Sernet software.

Parnet Cable

This joins the parallel ports of two Amigas together to allow the use of the Parnet networking software. This software will control the connection between the two machines and allow the transfer of data between the two Amigas. This will also connect a CDTV to an Amiga.

Null Modem Cable

This cable joins the Serial ports of two Amigas together. Data can then be exchanged between the two machines. It is also possible to connect an Amiga to a PC in the way. Twin Express can then be run on both machines to effect the transfer.

1.8 "

The Assassins Ultimate Games CD

The Assassins CD contains over 600 games running directly from a custom menu system. Capable of running on all Amigas and the CD32 & CDTV. This CD also contains all the Assassins floppy disks from 1 to 200 archived ready to be placed back onto a floppy disk for the Amiga.

When Amiga Format reviewed this CD they rated at 95% and said 'every single aspect of this excellent disc is highly polished and oozes complete professionalism'.

The games have been separated by type and all the control requirements are detailed. Instructions for each game can be accessed via Amiga Guide from Workbench. The ultimate games and the ultimate in entertainment for your Amiga.

1.9 "

Following on from the highly successful Weird Science CD's, Clip Art, Fonts & Sounds Terrific, Weird Science have launched Animations CD. Another double CD set at the unbeatable price of £ 19.95. This set is dedicated to Animators from all over the World and contains animations in a whole host of formats and on a plethora of subjects. Over 1 gigabyte of artistic delight that is both Amiga and PC compatible. All of the animations on both CD's will play on an Amiga and the whole second disk will display directly without conversion on the PC. All of the animations are viewed directly from an Amiga Guide menu system that makes playing the Animations simple. Although these disks do not boot directly on an Amiga they can still be used with the CD32 by booting with our Network CD and then replacing the disk with Animations CD 1 or 2 and then running an 'Assign' icon. The animations are then accessible to the CD32. The animations range in size up to those requiring over 10 megs of RAM to display. Where possible the animations are spooled directly from the CD's to minimise the resources required. The formats supported are IFF, FLI, Movieplayer and Deluxe Video. Viewers included for ECS & AGA Amigas and IBM PC's.

1.10 "

The long awaited sequel to Multimedia Toolkit has arrived. Multimedia Toolkit 2 is a double disc set aimed at music and video professionals and enthusiasts. The contents include the full Octamed 5.04 package, (with Aura sampler support). Octamed will run directly from the CD or can be installed to your hard disk. In excess of 250 megs of support files for the Octamed package have been included, made up from modules, samples, midi files and utilities. Full documentation in Amiga Guide format also included. Octamed is a commercial program and is simply the best 8 voice music maker on the Amiga. In addition we have included the full MidiCraft collection of Midi and Music X files, samples, modules, tutorials and utilities. Midicraft are professional musicians and have provided over 50 megs of data from their collection. The graphics side of the collection is well catered for with 500 24 bit images geared towards backgrounds, textures and general interest subjects. Conversions to 16,256 & Ham8 colour palettes have been provided where appropriate. Over 140 megs of Imagine objects, 50 megs of Lightwave objects and versions in .DXF format for PC's. Following on the professional theme is the EPS clipart, Adobe fonts, Colour Fonts and Vista Pro DEM files. A very large collection of MagicWB icons round off over 1 gigabyte of data ready to use directly from the CD's, no unarchiving.

1.11 "

United Public Domain Gold

The Entire United Public Domain Library on 4 CD's
 =====

FOR ONLY £ 29.95

For the first time ever United Public Domain present their entire Public

Domain Library on FOUR Compact Discs. UPD Gold contains over 4,800 disks archived in the DMS format neatly arranged into subjects and accessed from an Amiga Guide document. This document provides lists of the contents and buttons to un-archive the disks back to floppies. It is even possible to un-archive the disks from a CD32 using an Amiga and the 'Network CD'. The following is a list of the main categories on the CD's.....

Mono Clipart (156 disks)
Coloured Clipart (95 disks)
Structured Clipart (24 disks)
Coloured Brushes (16 disks)

AGA Images (112 disks)
Animations (142 disks)
Power Animations (214 disks)
AGATron Animations (62 disks)
Slideshows (116 disks)

Literature (32 disks)
Music (258 disks)
Music Utilities (185 disks)
Business (65 disks)
Education (115 disks)
Religion (4 disks)
Utilities (733 disks)

Games (572 disks)
Games Galore (18 disks)
Games Galore AGA (18 disks)
Funpack Games (37 disks)
Assassins (198 disks)

Urban (6 disks)
Demos (285 disks)

Amigos (11 disks)
Amos (22 disks)
Fred Fish (994 disks)
Jam (10 disks)
Gold Fish (3 files)
Scope (220 disks)
Snag (12 disks)
TBag (78 disks)

Wildlife on CD

=====

ONLY £9.99

Over 600 beautiful images of Wildlife on Compact Disc. The images are in 24 Bit Jpeg format and also IFF (256 colours) and GIF (for PC's). The IFF images are easily viewable from an Amiga Guide document and all the images have been provided with Index images of each directory.
