

## ROOM for Windows!

This program tells you information about your disk drive. It will tell you (with regard to the selected drive):

- Free space
- Total disk size
- Used space
- Available clusters
- Total clusters
- Bytes per sectors
- Sectors per cluster

To change drive, select the drive button.

Room for Windows V1.1 (c) March 1995, Specific Software. Written by Al Priest. Click [here](#) for features list.

Free source code available by e-mail on request!!

BWCC advanced interface

### **Features pending...**

Same functionality of information in .DLL file useful for linking in with Visual Basic or any other programs

### **Help WANTED!!!**

If anyone knows how to make my drive list support double clicks then please let me know. At the moment to select a drive I have to choose the drive and then click Ok. I would like to be able to simply double click the drive letter to select it. Can anyone help???
