CompuServe: 75540,1770  
Internet: 75540.1770@compuserve.com

This Visual Basic sample program set is provided to illustrate various techniques which could be used in development of a terminal emulation package. Some of the control code sequences found in the source code pertain to a non-existent terminal, and are included for illustration purposes only.

### REQUIREMENTS:

Microsoft Windows 3.1  
Microsoft Visual Basic 3.0 Professional Edition  
**MSCOMM.VBX dated 12MAY93 or later**  
**THREED.VBX dated 16JUL93 or later**  
486 or better CPU (performance consideration only)

### NOTES:

This sample VB application has been derived from an existing and operational terminal emulation package supporting Async, TCP/IP (WINSOCK), and NetBIOS transport layers. There will be areas of the program which may look a bit strange ... such as SELECT clauses with only one CASE ... this is due to having everything but Async removed. Other items such as various control code sequences and buttons used in the original emulator have also been removed for simplification purposes. Therefore, some areas of the screen layout, such as menus, may not be optimal. We have attempted to simplify this sample program without being too disruptive as to add bugs to the logic.

**This sample is meant to be distributed "as is" by Whisper Computer Solutions of San Antonio only.** The program and all of its parts are shareware, not freeware; but, you may use this sample however you see fit for as long as you need it... and as long as you follow these moral conditions:

1. Do not sell this sample.
2. Do not take credit for this effort.
3. If it helps your development effort, please register by sending a small contribution (not necessary, but will probably make us more likely to do this kind of thing again!). A contribution can consist of one or more of the following: (a) \$10, (b) more than \$10, (c) any substantial enhancements or "fixes" to this sample. What you get for your registration dollars... support and updates (both via email); updates will be sent only if requested.
4. You do not distribute this sample program. If someone is interested in obtaining a copy, please refer them to us so we can keep track of the software, and reap any benefits from such transactions (We are open to royalties if anyone is interested!). This will also assure that the requester receives the most up-to-date version of the sample.

If you have any questions or problems, please contact us via our CompuServe account listed above.
