To install or demo simply double click on the button below. You will be given a choice to demonstrate the macro, install the macro globally (default) or install to a specified template:

~~[Install/Demo]~~

This macro inserts a print field at the current insertion point that will print either DRAFT or COPY diagonally across a page.

It presents a dialog box for you to choose which word to print.

If you want every page of a document to have DRAFT or COPY across the background, then you should select the header of the first page and run the macro on the open header pane.

Version 2 allows you to supply an alternate mark.
