

**DRIVES Version 1.1 (08/08/90)**  
**Copyright 1990 by LyWhit Software**

**RELEASE 1.1 INFORMATION**

This release 1.1 of DRIVES. Drives will now save default information in an .INI file if you choose. The INI file will be created in your windows directory and is called LYWHIT.INI. Check the item 'Save Options' under the 'Options...' menu to save your defaults when you end DRIVES. The options that you can save are the 'Update Rate...' and 'Icon Is...'.

Please note that our original download readme files for verison 1.0 had an incorrect ZIP CODE for our address. The correct one is included here.

Please send us a measely \$1.00 for your vote to keep sending these utilities and register the product.

**DRIVES INFORMATION**

DRIVES is a Windows 3.0 Application that can display the following information:

- The fixed disk drives on your system with:
  - The amount of total space on the disk.
  - The amount of used space on the disk.
  - The amount of free space on the disk.
  - The percent of free space on the disk.
  
- Information on each disk is also available with the following:
  - The total number of clusters.
  - The availavle cluster.
  - Sectors per cluster.
  - Bytes per Sector.

DRIVES can also display the following information in an Icon:

- The drive letter and the amount of free space as a percent and in K.

**USING DRIVES**

DRIVES has two ICONS available for you to choose from the properties menu. These ICONS are the LyWhit Software logo and DRIVES. You can choose the ICON that displays the picture that best describes what you want to use DRIVES for.

When DRIVES is started the box will appear at the top left corner of the display and will display all the drives and space for each drive.

DRIVES has two main menu options: "Options" and "Help".

Help has three choices for "Exit", "About" and "Help". "Exit" will terminate and "About" will display the version number of DRIVES.

"Help" will display a message that will tell you to read this file  
On-line help will be implemented with the next version of DRIVES.

The Options menu has four choices: "Update Rate..." , "Icon is..." , "Drive info..." and "Save Options...".

"Update Rate" will allow you to change the rate at which DRIVES updates its information. The times range from .10 seconds to 60 seconds. The default rate is .10 seconds.

"Icon is" will allow you to choose what DRIVES will display when it is an ICON. The choices are each drive that you have on your system. The default choice is Drive C:.

When you minimize DRIVES to an ICON it will display the drive you requested in the ICON. This number will continue to be updated at the Update Rate that you selected. When the DRIVES ICON is enlarged all the information will be displayed once again.

"Drive Info..." gives you more information about that disk in a box. Double clicking the line of the drive on the main screen will perform this function as well.

"Save Options..." allows you to save your default options in the 'LYWHIT.INI' file when you exit DRIVES.

## **COMMAND LINE**

You can also pass command line options to DRIVES. This command line option tells DRIVES which disk you want to see in the icon. The default is Drive C:. Use the / and the drive letter for your choice.

Example: DRIVES.EXE /D will default the "Icon is..." to Drive D:.

## **PROBLEMS, QUESTIONS or COMMENTS**

If you have problems or questions about DRIVES please contact us at Compuserve ID 71511,1072 Or at the address below.

## **SEND US ONE DOLLAR (\$1) AND WE WILL WRITE MORE**

We are releasing TASKS and DRIVES into Shareware at the same time. We are asking for One Dollar for each of these programs. We are considering this a type of Vote. If we receive \$200 nationwide we will consider it a YES vote to Windows utilities. If we don't receive \$200 nationwide for these two programs we will consider it a NO vote to Windows Utilities If we can't get 200 people to send in \$1 across the whole country then we will consider the interest to be too low to justify writing any more programs.

If the vote is YES we will attempt to release 10 utilities for Windows 3.0 over the next year. We will ask for One Dollar apiece

for these utilities or \$10 for all of them. These will include Program Launch, Memory Management and various other utilities. Currently available Windows Utilities for 3.0 are selling for over \$100.

If you would like to vote YES please send One Dollar to :

LyWhit Software  
7107 East 131st Street  
Grandview, MO 64030

You may also send questions or comments to us at the above address or CompuServe ID 71511,1072.

### **Release Notes:**

Version 1.1 (08/08/90) - Fixed bug that displayed negative numbers in the Dialog Box that displayed the Total and Available Clusters on drives larger than 32 Meg. Added percent free to the screen and the icon. Added a save feature to save the defaults. Made it so you have to 'double click' the line to see more drive information.

Version 1.0 (07/25/90) - Original Release.
