

To create a new mod:

- 1) Choose 'New' from the File menu.
- 2) Enter the number of voices you want your new song to have. You can change this number at any time.
- 3) Load some instruments by choosing 'Load Instruments' from the Instruments menu.
- 4) Open the Editor window and choose an editor view to use: either standard or staff.
- 5) Start composing by inserting notes. (See the Editors section of the help system)
- 6) Set up the sequence table, making sure you don't have any gaps in the sequence. (See the Sequencing section of the help system)
- 7) Save your song. Congratulations, you have just created a mod!
