Jeremy's Power Countdown CSM 1.0.0

What is it?

ower Countdown CSM is a Control Strip Module that shows the remaining time before the various power conservation features kick in.

Next to each icon indicating a specific power conservation feature (disk spindown, screen dimming, system sleep) is a bar indicator that illustrates the amount of time before that power conservation feature becomes active.

Compatibility

The Power Countdown CSM will work on any Macintosh that supports a recent version of the Power Manager Dispatch software.   When this manual was prepared, this included:

- PowerBook 190 series
- PowerBook 5300 series
- PowerBook 500 series
- Performa 5400 series
- Performa 6400 series
- Power Macintosh 7200 series
- Power Macintosh 7500 series
- Power Macintosh 7600 series
- Power Macintosh 8500 series
- Power Macintosh 9500 series
- PCI-based Power Macintosh Clones (Power Computing, UMAX ,etc.)

Installing the Power Countdown CSM

1) Open your System Folder.
2) Drag the Power Countdown CSM file to the Control Strip Modules folder.
3) Restart your PowerBook.

Configuring the Power Countdown CSM

Once you've installed the Power Countdown CSM, you can configure it to match your personal preferences.

opup menu
