

Jeremy's Caps Lock CSM 1.0.1b1

What is it?

[ower Caps Lock CSM](#) is a Control Strip Module that shows the status of the Caps Lock and other modifier keys. This is useful on some PowerBooks and desktop Macintoshes that don't have an illuminated Caps Lock key.

You can also have the CSM play a selectable sound whenever the key is depressed and released.

Compatibility

The Caps Lock CSM will work on any Macintosh.

Installing the Caps Lock CSM

- 1) Open your System Folder.
- 2) Drag the Caps Lock CSM file to the Control Strip Modules folder.
- 3) Restart your PowerBook.

Configuring the Caps Lock CSM

Once you've installed the Caps Lock CSM, you can configure it to match your personal preferences.

ain popup menu

The popup menu lets you control the appearance of the Control Strip.

Show Shift key

Displays the status of the shift key.

Show Option key

Displays the status of the Option key.

Show Command key

Displays the status of the Command key.

Show Control key

Displays the status of the Control key.

Selecting Sounds

You can also assign sounds to each modifier key that will be played when the key is depressed or released. To set the sounds, click on the icon for the key you want to configure (i.e., click on the "clover" icon if you want to configure the Command key).
