Chapter 1

workbench

1.1 Welcome

Hi, this is the second time I've sent pics into AF. I've recently ←
got a 24-bit
Graphics card so I thought I should send in pictures of my new workbench.

Because previous workbench pictures have had little documentation I am giving
as much detail as I can think of in here.

About Me
Feel free to use this document as your own template.

If you want any of my backdrops or whatever please email me!

1.2 My Amiga

I own an A1200 with:

- 603e PowerPC 180Mhz
- 68040
- BVision PPC Graphics Card with Permedia 2 Chip
- 48Mb Ram
- 8 Mb Video Ram
- 1 Gb Hard Drive
- 24x CD-ROM
- 4x CD-ROM
- 33.6 Voice Modem
- Epson Stylus 600 Printer
- 15" Monitor

1.3 My Workbench

I use ScalOS as a workbench replacement (far better than Opus, Ben!) and I have
an 800x600 16bit display. There are four shots of my workbench.

I have about 50 backdrops which are chosen at random on boot. I have got most of
them from various sources on the internet.
Not pictured are any of my 3D southpark backdrops which are very good. They can be
downloaded from http://www.sweeet.com/.

The Aps which I use and can be seen in the pictures are:
