GUIDED

1.1 Main

Welcome to Guided!

Guided is a small editor made specially to create AmigaGuide documents. This document is ofcourse made with the program :)

History Bugs

Author

1.2 Info about the author

Author of Guided is Linus McCabe.

I'd like to thank

Jessica, Jimy, Allan Odgaard, Michaela Prüs & Michael Lünse.

Other released projects of the author are

° bdAnim, a simple animationplayer to use as backdrop for the workbench. ° AmiSoxPPC, a PPC compile of AmiSox 3.3.

1.3 Copyright

Guided is copyright © 1999 by Linus McCabe, Sparkle@hehe.com. It's released as freeware, meaning that the program may be copied and used freely as long as it's not altered in any way.

MUI is copyright 1992-97 by Stefan Stuntz TextEditor_mcc is copyright 1997-98 by Allan Odgaard. Toolbar_mcc is copyright 1998-99 by Benny Kjær Nielsen.

1.4 New Node

The program is released 'as is', i e the programmer takes no responsibility whatsoever to any damage, loss or data or other disaster the program might cause.

There you got it, right in ya face!

1.5 Usage

This part of the guide is not yet started.

Since you dont have any instructions to read, why dont you visit

http://lsiten.to/causeofclass

1.6 Todo

° check for multiple nodes (MP)

° check the guide for faulty nodes/links (MP)

° sorting nodes alphabetical or by 'nextnode' (MP)

° remove nodes

° merge guides (MP)

° nodelist to listtree

° Automatic saving (MP)

° fix styles reloading

° use last save dir and maybe a 'recent' menu (MP)

° ascii & html export

° node index creator ° word index creator (MP)

° Better link insert

° preferences preferred load/save dir new guide template new node template

° WYSIWYG guide editor class

° node save (export) and insert

1.7 History

V0.2ß 5-Apr-99 After some feedback a few bugs have been fixed, a couple of new features have been added and alot of stuff have been added to the TODO.

° Made saving safe(r) (MP)

° Added a progressbar when loading guides.

° If only one guide is loaded, it does not need to be selected for a save/kill operation.

° Put back parsing of styles etc. when loading.

° Changed all the toolbars to Toolbar.mcc by Benny Kjær Nielsen. Some of the new gadget- images are stolen from Bennys Toolbar arc- hive, some are drawn by me. Benny's looks pretty good, but mine sucks :)

° Fixed the non updating nodelist when changing nodenames. (MP)

V0.1ß 94-Mar-99, Second release, still an unfinnished product. I just released this, because I know a couple of people out there are using the previous ver- sion, and they might want the bugfixes.

Still didnt start the WYSIWYG class.

° The 'changes made' image wouldnt update after a save, FIXED.

° The 'save' function would sometimes forget to add a '/' between the path and the filename.

° The texteditor will use it's fixed font (if one is specified in mui prefs, anyway) This should be make it easier to edit guides, since they are normally displayd with a fixed font.

° Compiled for 68000 and with optimizing on, mostly for fun.

V0.0ß First release. Prerelease of a pretty unfinnished product.

1.8   Bugs

Sometimes 'save as' wont work. Didnt find out why yet.

Alot of the menues are unimplemented.

Remarks will dissapear. Dunno if its worht fixing?
