1.2 svx.datatype/svx.datatype

NAME

svx.datatype -- data type for 8svx and 16sv sounds.

FUNCTION

The svx data type, a sub-class of the sound.datatype, is used to load 8SVX and 16SV IFF files.

METHODS

OM_NEW -- Create a new sound object from an 8SVX or 16SV IFF. The source may be either a file or the clipboard.

SEE ALSO

sound.datatype.
