Black: 16
zhuge(NR) but i am not happy at all...
White: 17
monet(10) who is jiang jujo?
rhoades(1) isn't it conventional for w to take 3–3 after m17
Black: 18
rjs(19k) why zhuge?
stone(NR) similar moves to those in kobayashi–otake
zhuge(NR) we had 150 people there waiting and waiting...
now we had to move to here...
et(NR) gee, is this hide and seek or what?
rjs(19k) true..
not much you can do about network problems..
xiaoqian(7k) there's no Jiang here zhuge.
Maaniker(4) tell zhuge were you on berkeley until recently?
Cdude(5) how long till we overload the frnch network too. ;–)
Maaniker(4k) french stronger
zhuge(NR) i was on berkeley all the time until got disconnected.
and i was here for quite a while now.
Maaniker(4k) how many moves did they make until you got disconnecteed?
monet(10k) is tweet now really jiang 9p?
Maaniker(4k) think so
pepboy(NR) yes
mof(13k) Yes it's a metamorphosis
zhuge(NR) ' about 10.
et(NR) pepboy?
Maaniker(4k) ok we were too. ::(
xiaoqian(7k) who i spepboy?
White: 19
rjs(19k) sheah
zhuge(NR) okay: pepboy is sitting beside sheah
Maaniker(4k) pepboy is sheah
zhuge(NR) tweet is sitting beside jiang.
zhong(NR) yes, sheah is pepboy!
xiaoqian(7k) isn't r3 better?
Black: 20
cty(2) they are playing face to face?
zhuge(NR) pepboy and tweet are typing the moves for the two.
sheah/pepboy is in illinois, jiang/tweet is in california.
xiaoqian(7k) are you sitting with them zhuge?
xmas(NR) how did you know, zhuge?
squid(8k) zhuge knows everything
scoffin(1) seems reasonablke :–)
zhong(NR) i feel sorry for all the people who missed this game due to the berkeley machine down.
zhuge(NR) me too, zhong.
and i feel lucky i get here before it's full. :–)
cty(2d) no way to inform them?
sweat(6) hi zhong
Maaniker(4k) no, thanks :)

mof(13k) Only with ESP

White: 21

ox(4d) i phoned my friends to come here

bh(1d) i wonder why can't they connect?

rjs(19k) not full yet, only 7 more slots

xmas(NR) where are your uncles, aunts, cousins, zhuge?

zhuge(NR) good ox...

White: 23

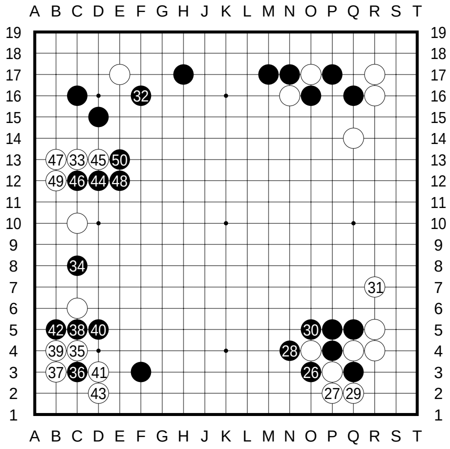
zhuge(NR) gee the last two moves...

xray(???) If I get kicked off will you keep my place.

White: 25

zhong(NR) so call your frends to come to here

zhuge(NR) hard, xray. :–)



Black 26 – Black 50

Black: 28

xray(???) I don't like this joseki for b.

White: 29

rjs(19k) this is more fighting than I would expect from pros

rhoades(1d) fine for b i think

zhuge(NR) looks werid to me.

bh(1d) typical fot jujo

xiaoqian(7k) why don't o2 first?

monet(10k) have jiang and sheah played before?

White: 31

zhuge(NR) probably not, monet.

ox(4d) maybe b was afaied of w's possiable moyo in the middle–right region

rhoades(1d) b has lots of power, so playing a center game

White: 33

zhuge(NR) i am rooting for sheah/pepboy. :–)

xray(???) r7 and q14 perfect relationship.

zhong(NR) me too. :)

Black: 34

sweat(6d) i am rooting for tweet jujo! :)

xray(???) yeah go Jujo !

xmas(NR) i am rooting for sweat/zhuge

xiaoqian(7k) q7 better?' e13?

cty(2d) e17 stone is huge

stone(NR) now C17 is good for white

zhong(NR) i am digging the root of zhuge. :)

zhuge(NR) please!!!

sweat(6d) what do you mean zhong?

Maaniker(4k) C8

zhuge(NR) digging my root is digging the root of socialism.... :–)

zhong(NR) uproot zhuge. :)

ox(4d) i have a bad feeling that sheah will lose this game

willfor(3) f3 is losing move.

ying(4) what do u think about the upper right corner?

sweat(6d) that is a good feeling :) ox

Kibitz(NR) me too.

szheng(5d) basic instinct

monet(10k) is it usual for a 9p to give 2 stone handicap to a 5p?

sweat(6d) awesome movie! :)

zhuge(NR) :–)

xray(???) It used to be usual but not recently.

zhuge(NR) you saw that, sweat?

Rin(4) Jiang is a strong 9p

xmas(NR) no, the nice thing about giving people more stones is

sweat(6d) the best! along with t2 and sneakers!

login(4) where is this server?

szheng(5d) who is stronger, Jiang or Rui?

xmas(NR) well... i made it clear on the berkeley server

sweat(6d) who is Rui?

stone(NR) Rui, of course!

zhuge(NR) Rui, on or off the board.

White: 35

Maaniker(4k) The ONLY move!!!!

zhuge(NR) Rui is Jiang's wife. the only female 9p in the world.

szheng(5d) why of course?

sweat(6d) oh :)

rhoades(1d) i think f16 might should have been c12

zhuge(NR) she's his wife! that's why... :–)
i love c8!!

stone(NR) Jiang just got No.4 at fujizawa's winter camp, while Rui got No.3

et(NR) I thought they got divorced.

zhuge(NR) already, et? so fast? :–)

zhong(NR) so fast?

Maaniker(4k) B4?

ox(4d) i like c8 because b's ll corner is solid

szheng(5d) nowdays, male and female r equal

xray(???) such gossiop et tell me more.

xmas(NR) just like what happened to you, zhuge

et(NR) Oops! Is she his new wife?

stone(NR) B8?

szheng(5d) i think they need to fight for it

zhong(NR) zhuge got divorced before getting married.

bh(1d) what r u talking about, et?

zhuge(NR) yes high dans... what should w do, normally?

xiaoqian(7k) divorcing whom and marrying whom?
sweat(6d) resige! :)
ox(4d) d8 ?
mof(13k) I would have kept them all
zhuge(NR) LET'S TALK ABOUT THE GAME!!!
xmas(NR) who, sweat?
xray(???) how boring zhuge.
xmas(NR) okay, zhuge, sorry to remind you of it
bh(1d) b4
szheng(5d) d8

Black: 38

et(NR) I heard one of chinese 9p got divorced from her wife 9p.
zhuge(NR) that's Nie, et.
stone(NR) that is Nie wei ping
yitao(5) female 8p, not 9p
szheng(5d) is Kong 9p?
et(NR) so I thought it was Jiang. Maybe I am mistaken.
Maaniker(4k) his wiffe or her wife?
xray(???) Kong is only (?) 8p.
rjs(19k) "her wife" ?
zhuge(NR) kong is 8p; so far.
c5?
et(NR) I C. Thanks, folks, for clearing me up.
xray(???) She can't promote unless she goes back to China.
stone(NR) I feel sheah will lose on time
zhuge(NR) well, 8p is good enough.
addtime sheah 100
oops didn't work. :–)
xiaoqian(7k) where is she?
yitao(5d) the statement of only female 9p is Jiang's wife is correct
rhoades(1d) pushing thru with c5–b5 and giving up corner might be interesting
et(NR) How many women p's in china?

White: 39

Kibitz(NR) Taiwan
ox(4d) c5
zhuge(NR) see, c5!

Black: 40

zhuge(NR) now what?
Rin(4d) I thought Kong is in japan.
xiaoqian(7k) c5 no good

White: 41

ox(4d) c5 good for the middle.
Maaniker(4k) C5 makes thickness
bh(1d) w going for the corners
zhuge(NR) yes, and i think that's what b has in his mind.
szheng(5d) c5 is correct,
sweat(6d) because jiang always goes for the thickness

Black: 42

szheng(5d) if w's c13 group is still weak, then w can't c17
sweat(6d) sheah is counter building the thickness
xray(???) for d3 I expected b5 :–(
zhuge(NR) so b is trying to avoid jiang's normal game plan?

White: 43

zhuge(NR) you said it better, sweat. :–)
szheng(5d) c2
sweat(6d) that's what i would say
zhong(NR) sheah does not know jiang's game plan.

Black: 44

zhuge(NR) thanks for the correction, zhong.
sweat(6d) but if sheah has ever seen jiangs games before?
watanabe(4) thanks
zhuge(NR) he should. he knows jiang's habit, i guess.
sweat(6d) or maybe sheah just enjoys playing thickness :)
bh(1d) i don't think jiang always goes for the thickness
ox(4d) e9 ?
xiaoqian(7k) e7?
xray(???) In his other IGS games he always plays thickly.
xmas(NR) sheah never read anybody else's gmae
sweat(6d) he did when he played me
zhuge(NR) jiang goes for killing... that i know.
bh(1d) yeah, he kills, :)
zhuge(NR) he didn't when he played me.
Maaniker(4k) who?
watanabe(4d) is sheah white or black?

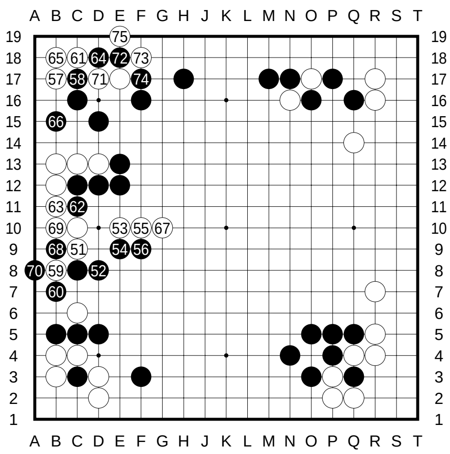
White: 45

zhuge(NR) black H2
Maaniker(4k) sheah b
rjs(19k) sheah b getting 2 stones
watanabe(4d) i see
szheng(5d) i am about to say ' sheah is yellow'
zhuge(NR) where is ychen?
jiang doesn't need oxygen.
xray(???) w c12 then c14 after b d11 ?
bh(1d) oh, i c he's healthier, :)
sweat(6d) blacks looks so much better until this point!
zhuge(NR) wow, you *are* xray... seeing so deep.
ox(4d) jiang already lost a game. check "stats tweet " !
et(NR) really?
zhong(NR) zhuge, send email to ychen, or call him.
bh(1d) that must be the product of real tweet
stone(NR) where is jansteen?
zhuge(NR) i don't have his number... :–(
jansteen went to sleep.
zhong(NR) jansteen is sleeping.
stone(NR) how do u guys know?
zhuge(NR) he sent us email (right zhong?)
stone(NR) I see
zhong(NR) who is he? ychen? send him email.
zhuge(NR) did jansteen send you a message too? zhong?
zhong(NR) no

Black: 46

zhuge(NR) he sent me one; he went to sleep. :–(

i just sent ychen a message...
Maaniker(4k) w invites b to chop him to pieces
zhuge(NR) then b should go ahead!
xiaoqian(7k) when c10 jumps up, b is in trouble
White: 47
szheng(5d) ok, fight
Black: 48
zhuge(NR) good. fight.
Maaniker(4k) b's got a strong position
zhong(NR) e12
zhuge(NR) b13 looks scary. to me. :–)
xiaoqian(7k) b12
sweat(6d) this does not look like jiang
chl(NR) who is sheah? is he also a professional player?
zhuge(NR) yes, chl.
zhong(NR) why not?
Maaniker(4k) sheah 5p
bh(1d) why? this is jiang
Black: 50
zhong(NR) e12 is the right move.



White 51 – White 75

White: 51
sweat(6d) jiang i know is so much better !
zhuge(NR) good. b is looking for center
be patient, sweat.
Black: 52
Maaniker(4k) b is ahead with about 2.5 points now
bh(1d) u'll see, sweat
zhuge(NR) no, 3.5
sweat(6d) :(
zhuge(NR) :–)
et(NR) no, –0.5.
xiaoqian(7k) no, 5.5
White: 53
zhuge(NR) wow, everyone remembers to add .5 :–)
zhong(NR) he may regress, sweat. :)
sweat(6d) what does regress mean?
Black: 54
xray(???) I got kicked out again. but made it back phew.
zhuge(NR) regress means going backward or retreat, i guess.
Maaniker(4k) negress?
White: 55
sweat(6d) hahaha negress!
Black: 56
xray(???) wow f10 can b d10?
zhuge(NR) sweat, what do you think about f10?
jiang's move?
xiaoqian(7k) no way
szheng(5d) too many 2nd line for w
sweat(6d) only move?
zhuge(NR) well... if it's only move... you can't tell who that is. :–)
cw(4) do not worry for w,
zhuge(NR) yeah, i am rooting for b...
ox2(NR) g9 only
szheng(5d) c11 then d10?
cw(4d) w will invade
xiaoqian(7k) b can't go for d10
xray(???) if f10 works then maybe b e9 was no good.
et(NR) g12 or h12?
bh(1d) g9
ox2(NR) w e14 not working. so e9 only
szheng(5d) if d10 doesn't work, then e9 wrong
ox2(NR) b g9
mof(13k) Isn't g8 better than g9?
xiaoqian(7k) no
zhuge(NR) just remind you people: this could well be the first anniversary of IGS!!!!
et(NR) b h12.
xray(???) happy birthday IGS.
szheng(5d) g12
xiaoqian(7k) heppy players
sweat(6d) happy birthday sweat!
zhuge(NR) yes, happy birthday... a tough one (forgot to buy a cake.. :–)
sa(2) is this the game 9p–5p?
stone(NR) happy birthday, sweat
xray(???) just think "a whole year wasted on IGS"
zhuge(NR) ;–)
rjs(19k) don't need cake, have pro game!
xray(???) how much could I have achieved otherwise.
szheng(5d) wasted?
sweat(6d) thank you stone
scoffin(1k) only one year wasted so far :–)
stone(NR) u r welcome, sweat!
mof(13k) Don't worry there'll be more of that
zhuge(NR) think about the years to come.
szheng(5d) so much fun
xray(???) i hope i can waste a few more years yet :–)
Rin(4d) b is calculating about d10 cut
stone(NR) now sheah only have 14 mins left
xiaoqian(7k) how about a whole life?
pinback(7) what is byo–yomi time?
Maaniker(4k) K8
szheng(5d) d10 too early
rjs(19k) seems hard to imagine that go through all

this trouble to get this game arranged
zhuge(NR) pcigc folks, your author is testing pcigc. :–)
et(NR) b must be checking if c11 works.
rjs(19k) then not have people add time..
xiaoqian(7k) how about f8 then d9?
zhuge(NR) rjs –– that's what i meant that we didn't buy a cake. :–)
Maaniker(4k) K8 will work beatiful with b's lower side
White: 57
rjs(19k) :)
szheng(5d) b has to worry about w's e14
ox2(NR) i just found out some thing bad for b. w h3 and m3 can make a live in the b's region . too bad.
xray(???) this is better than a cake. (although a cake might have been easier.)
zhuge(NR) yeah... phuuuuuuuuuuuu
i was trying to blow the candle. :–)
szheng(5d) Jiang and sheah , maw
zhong(NR) w is gearing up for e14!
ox2(NR) w e14 b f14
szheng(5d) you r welcome
we have shih now
stone(NR) where is xiang?
szheng(5d) need shi–an
xiaoqian(7k) w doesn't want to waste a move at d9. but b d10 works otherwise
xray(???) w g10?
Black: 58
xiaoqian(7k) and d9 will thicken the b group
zhuge(NR) b17!
ox2(NR) c17 simple
zhuge(NR) an undo?
Maaniker(4k) yes of course
mk(NR) is this THE game?
monet(10k) wow!!
stone(NR) no, two stones r missing on the board
Maaniker(4k) F10
bh(1d) what happened to f10?
xiaoqian(7k) i haven't heard that there is an undo in a pro's game
Maaniker(4k) the didn't save the game before shutdown. they need to replay
kass(5) it's not an undo, the server missed 2 moves when it crashed.
rjs(19k) right, so calm down
zhuge(NR) i see... i guess that tweet just fixed the "full" bug.
pinback(7k) they have more time now.
xiaoqian(7k) c17?
ox2(NR) yes c17.
White: 59
sweat(6d) c18
cw(4d) c18
zhuge(NR) now if it's full again, i don't think it would crash like last time.
ox2(NR) b17 was not that good, i think
xiaoqian(7k) i don't think w can gain too much at that corner
why not?
zhong(NR) i think when the total no. of players reach a number, the server will cruch.
i mean crush.
sweat(6d) what number is tha
Maaniker(4k) no, the server probably have memory leak
stone(NR) then dispell those who r logining
bh(1d) u mean crash, :) ?
Maaniker(4k) and it crashes when some pointer is full
zhong(NR) i mean crash, right.
scoffin(1k) new server command needed: dbx :–)
stone(NR) sorry, I am kidding, it seems we have to live with it now and then
deepn(4) tired to type my passwords so many times tonight
cty(2d) really keep us awake
xiaoqian(7k) w is slightly behind now
xray(???) deepn you are lucky. i have to type telnet command too.
stone(NR) good judgement, xiaoqian [7k\]
zhuge(NR) was that another crash caused by "fullness"? :–(
kathy(25) i am so stupid.
xiaoqian(7k) you must have a super–long passward deepn
willfor(3k) it seems like the server crashes when it gets full :–(
White: 61
zhuge(NR) gee... this happened before in the old server in New Mexico.
scrub(NR) no more people login then!
zhuge(NR) i thought they fixed it.
Maaniker(4k) depends on which version...
willfor(3k) maybe it accepts too many connections.
xiaoqian(7k) b8 is desparate.
stone(NR) anybody show log out volunteerly when the server is full
xiaoqian(7k) the server should refuse any logins when it's full
saw(NR) barry and 3m have gone :–)
deepn(4d) you break accounts? ychen?
scoffin(1k) may not be server itself full, just too many kibitzers
ychen(NR) haha, almost
willfor(3k) my guess is that the limit is set too high.
kathy(25k) what happened to berkeley's server?
zhuge(NR) we knwo have 61 people on.
let me test...
stone(NR) IMHO, "logout" should quit immediately when it reaches 62
bh(1d) yes
xiaoqian(7k) tweet is busy typing the game instead of fixing the berkeley server
kathy(25k) is pepboy sheah?
zhuge(NR) it seems i can't log on using another name...
ox2(NR) busing typing ? i did not many moves

tonite

Black: 62

Maaniker(4k) if you're more than two in the same room, just let one watch
zhuge(NR) geeee...
Maaniker(4k) if you won't overload this server
zhuge(NR) right, Maaniker!
willfor(3k) what did you say just before it crashed, zhuge?
saw(NR) YES!!!
xray(???) i will have to go soon.
kathy(25k) how about rest of kibitzers?
stone(NR) xray, please leave before it reaches 63
sweat(6d) if you are in same school, then find others and just use one account! :)
rjs(19k) Rob, I'm sure the weather is better there :)
zhuge(NR) thanks, yitao. :–)
sweat(6d) rjp your place?
xh(8) hi, 64 is the magic no.
rjp(14) Adelaide
xh(8k) don't use multiple login please.
kathy(25k) is tweet really jiang???
saw(NR) xray is very much appreciated for his kind leave :)
zhuge(NR) we know havea tiny room to spare.
lhf(4) Is this the Jiang–Sheah game? I just got here.
stone(NR) thanks, xray
zhuge(NR) yitao is back?
rjp(14k) yes, lhf
saw(NR) oops yitao is back :)
zhuge(NR) where is fmc?
jonky(7) in bed?
saw(NR) simultaneously, we got 20 observers
rjs(19k) probably asleep, is 4 am or so in france I think...
sweat(6d) i will
jonky(7k) closer to 6 I think
fchen(3) they said the server is locked.
jonky(7k) too many people
Maaniker(4k) the connection to berkeley is on again
szheng(5d) really?
fchen(3d) but locked.
jonky(7k) limit is 253.
szheng(5d) what do you mean
jonky(7k) we have 52 here so there could easily be more than 200 in berkeley
joker(9) so I stay
kathy(25k) is it w's turn now?
stone(NR) anybody with multiple account here and at berkeley?
rjp(14k) they tried to limit numbers before it "finally" crashed – that lock may still be on.
saw(NR) every account here is prototyped from the berkeley server
zhuge(NR) i don't think there is anyone on berkeley... they might be fixing it.
ox2(NR) who so slow !!!!!!
kathy(25k) is this game played on two differnet places?
deepn(4d) is 59
stone(NR) we should kick out the other 6 players who r playing now
zhuge(NR) what a day... i am driven crazy.
Maaniker(4k) why?
zhuge(NR) tweet totally ignored the problem... :–(
Maaniker(4k) they who play are doing a lot more than us ignored?
saw(NR) oh no. we suffered more :–)
zhuge(NR) he's not fixing it...
Maaniker(4k) ok
hoonsoo(NR) who is black
zhuge(NR) sheah/pepboy
still(NR) it is the copy of the big game?
hoonsoo(NR) thanks
monet(10k) can we lock this server as they did at Berkely?
zhuge(NR) it *is* the big game.
deepn(4d) is 61
sweat(6d) how do we lock the server?
Maaniker(4k) use a key
zhuge(NR) nothing going on in berkeley.
space(NR) we need fmc
monet(10k) how can they did it?
saw(NR) it's 59 now?
cty(2d) or everybody type lock?
jonky(7k) the call goes out for Superman...
deepn(4d) is 61
szheng(5d) this is crazy
watanabe(4d) we need a plan
Maaniker(4k) yes it's the Alpha Centaurian. They are messing with the server!!!!!!#$#@$@#$@#$@#$!!!!!!!!!!!
sweat(6d) let's ask tweet!
still(NR) what happened in usa server?
watanabe(4d) when it reaches 59, then all people of some rank should logou out for 10 minutes
zhuge(NR) we can't be like this all the tim.
jonky(7k) this server only allows 62 people
watanabe(4d) what do you think?
we can start with 5 dan
then 4 dan
deepn(4d) is 56 now
watanabe(4d) etc
scoffin(1k) berkeley server is up, but it is full
maw(3) yess 5 dans off
zhuge(NR) we can try, watanabe...
watanabe(4d) ok all 5 days off
saw(NR) seems the upper limit of this server is 62 players?
jonky(7k) now 59
sweat(6d) tell tweet!
jonky(7k) now 62!!
watanabe(4d) ok now all 4 dans off
deepn(4d) is 61
saw(NR) they should lock it

Maaniker(4k) so many kyu players andf NTR
zhuge(NR) happy birthday IGS!!! :–)
sweat(6d) zhong is probably on the usa server!
szheng(5d) who are using both berkerly and here now?
zhuge(NR) i can't... it's locked.
stone(NR) zhuge, did u reach tweet?
kathy(25k) where r they playing?
zhuge(NR) i tried. no response.
fang(1) why usa server so busy?
hoonsoo(NR) what a thickness of b!
szheng(5d) they must be playing at berkerly
White: 63
willfor(3k) they are playing here.
zhuge(NR) i don't believe there is *anyone* on US server.
sweat(6d) it is nopt busy it's locked
kathy(25k) how can we ob the game here
Black: 64
zhuge(NR) it *is* played *here* kathy.
lhf(4d) berkerly server is dead, I just tried.
White: 65
hoonsoo(NR) it is not dead. it is locked
screwup(NR) I believe they played at Berkeley, and they just relay there.
kathy(25k) i think whole berkeley's unix was shut off
ychen(NR) icsib18 is down
stone(NR) now, 58

zhuge(NR) in any case, nothing is happening in berkeley...
rjs(19k) its obvious that it was left locked after network problems
screwup(NR) So, I guess they just change some parameters, such that they can

kathy(25k) i quit just before the crash
stone(NR) those two players r very patient
White: 85
szheng(5d) wow, kill
saw(NR) no. not them. they r just dealing with a real board i guess
Black: 86
szheng(5d) seems sheah is more violent than Jiang
Meijin(6d) too tired to watch this game
monet(6d) is the w b13 group dead?
saw(NR) it's tweet and pepboy who r patient logging on
screwup(NR) I guess someone is relaying their game for us.
jjs(4d) i did not see the move before k4, what was that?
watanabe(4d) ther are 60 players now
stone(NR) the two players at game #2 r very patient
watanabe(4d) there are 62
White: 87
tom(1) is this the jiang–sheah game?
zhuge(NR) we are approaching the limit again...
stone(NR) oh, my!
jjs(4d) ok, i am out

Rin(4d) I cannot quit
zhuge(NR) berkeley is still locked.
dian(NR) we should have a person to manage this msse
saw(NR) did anyone say a word when i jumped? :–)
Black: 88
lhf(4d) whenever we reach 65, the server crashes.
stone(NR) brothers and sisters, do sth
zhuge(NR) but others have to listen!!!
saw(NR) it's 63 or 62, i think
dian(NR) who has the highest dan here ?
Meijin(6d) w dead stones left a lot of aji
sweat(NR) meijin is

screwup(NR) No, tweet!
White: 89
watanabe(4d) s 63 players
szheng(5d) full again
zhuge(NR) getting close...
szheng(5d) i am out

saw(NR) not yet
monet(6d) me too
szheng(5d) how to quit

Black: 90

zhuge(NR) well... shall we solve this problem?
sweat(NR) how?
monet(6d) sheah is in byo−yomi!!
jjs(4d) this is not like a pro game to me
watanabe(4d) nearly full
zhuge(NR) hard... if some of us log off, some other would coming in, and they don't know what we try to do!
saw(NR) no. that's because pro's don't play handigames for u, jjs
watanabe(4d) there are 61 players
fang(1d) can anyone retype this game?
saw(NR) thans to 15k
screwup(NR) Do you guys know how easily to install IGS program?
sweat(NR) how?
zhuge(NR) okay, if most of you leave now... tomorrow i will replay the whole game.
saw(NR) at least refresh is working
screwup(NR) If it is easy, probably, I can install it on my machine temporarily.
And someone relayed it for me.
szheng(5d) wow, you guys are fast
Cdude(5k) heh, heh.
szheng(5d) ok, noly observe and kibitz
screwup(NR) Sure, you got to be quick!

White: 93

szheng(5d) d6 good
screwup(NR) I think kibitz causes the same load as shout.
stone(NR) why not E3 for B?

Black: 94

szheng(5d) but kibitz is fun
15k(15) i am neww here
pepbou=sheah?
szheng(5d) wow, big gain for w in several moves
sweat(NR) pepbou= nothing
15k(15k) i mean pepboy sorry
still(NR) you guys all are the most patient people on the world
jjs(4d) pepyboy is sheah's hand
15k(15k) thanx
sweat(NR) who is on the world?
jjs(4d) which world?
Rin(4d) go world..
still(NR) you all are the most patient people on the world
sweat(NR) who is "on"the world?
szheng(5d) ok, in
screwup(NR) Yeah! We should get some award! :)
jjs(4d) inside?
sweat(NR) :)
screwup(NR) Only 45 people?!
chihyehc(6) the system does so.
jjs(4d) g10 group dead?
still(NR) :−). i was messed up by what happened tonight.

White: 95

screwup(NR) Not "messed up". It is called "screwed up". :)
chihyehc(6k) still you can use another telnet add instead of icsi. :)
szheng(5d) can we use quit command?

Black: 96

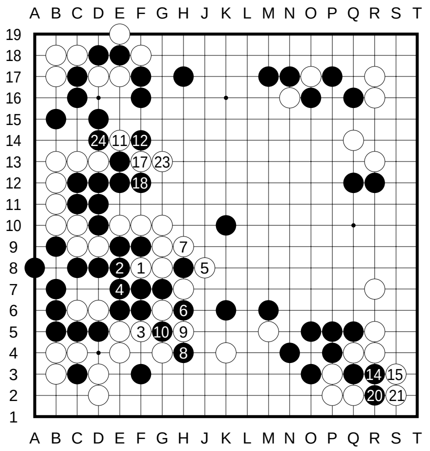
jjs(4d) use exit, szheng
screwup(NR) No, you cannot. :)
szheng(5d) so we are locked in side
screwup(NR) :)

White: 97

sweat(NR) use alt \] command
szheng(5d) what is that?

Black: 100

screwup(NR) If you use that, you violate what tweet said. :)
sweat(NR) press sorry control and \] at the same time
szheng(5d) so not alt
sweat(NR) control
jjs(4d) is there a sorry on the board?
screwup(NR) No sorry key. :)
monet(7k) i don't have sorry key :)
szheng(5d) sounds like Wei2Cheng2 kind of story
sweat(NR) haha
screwup(NR) black has a difficult time now.
monet(7k) b f6?
szheng(5d) people outside want to get in, while people inside can't get out
jjs(4d) maybe b k10 and h8 should be reconsidered?
sweat(NR) only 44!
stone(NR) so u guys can have more fun
still(NR) yes. w want to get out:−)?
szheng(5d) have you used refresh, sweat?
sweat(NR) yes how did you know?
stone(NR) we should salute to xiaoqian and dol, they r still playing
szheng(5d) you can't use refresh,
violate our rule
sweat(NR) :) how did you know?
jjs(4d) how do u know they are stll playing, stone?
tom(1k) try deoderant
stone(NR) games
szheng(5d) because you said Ctrl \]
still(NR) they are real serious go players:−)
sweat(NR) there are only 44 players it doesn't matter
screwup(NR) black need to save itself first at around E7.
szheng(5d) but you did violate the rule
still(NR) they started a new one, an amazing couple.



White 101 – White 125

113 at (g,6), 116 at 110, 119 at (g,6), 122 at 110, 125 at (g,6)

White: 101

stone(NR) who? me? not a chance
sweat(NR) so sue me!
stone(NR) only 42 present
szheng(5d) for what?
monet(7k) E6 is my move!

Black: 102

sweat(NR) for violating the rule!

White: 105

still(NR) you really mean present,stone;–)
szheng(5d) i only sue people for money

White: 107

szheng(5d) not for violate rules
sweat(NR) oh?
stone(NR) REM, type games, there r 38 r observing, 4 r playing, so there r 42

Black: 108

sweat(NR) i only violate rules not take away any one's money
stone(NR) I doubt it, REM
dp(NR) anybody know why h6 rather than h9?
szheng(5d) h9 no good
dp(NR) is h6 any better or not worse?
REM(4) szheng sure doesn't like to give informative answers!
szheng(5d) not worse?, if h9, w will glad to j9, j10
screwup(NR) I like H6.
jjs(4d) g5 sente now?
dp(NR) w glad to give the 6 stones up?
szheng(5d) is that informative or not
tom(1k) giveup g10 group, szheng?
szheng(5d) why not
tom(1k) thanx
big center then for w?
dp(NR) great strategy, szheng thank you.
jjs(4d) seems k10 not too usefull
dian(NR) b really has some time trouble
szheng(5d) you are welcome dp
csp(20) will sheah lose by time?

White: 109

dp(NR) i mean GREAT STRATEGY, szheng.
monet(7k) h5?
sweat(NR) why not just take?
screwup(NR) what strategy?

Black: 110

szheng(5d) i meant YOU ARE WELCOME dp

White: 113

REM(4k) It would seem if black plays around h11, then k10 helps wall off moyo.
jjs(4d) big ko
monet(7k) h5 my move again :)

White: 115

screwup(NR) I doubt black can win this Ko.
sweat(NR) huh?
jjs(4d) monet must be a 7d instead of a 7k
monet(7k) :) :)
sweat(NR) what is r3?
dp(NR) that's what i m trying very hard to figure out.
ying(4d) is this a ko?
szheng(5d) it is
csp(20k) I c
sweat(NR) oh s3
jjs(4d) r3 take cornner and atack r5 group?
ying(4d) what if r2 s3?
sweat(NR) and then r6 followed by s5
dp(NR) s3, then either r6 or r2.
szheng(5d) right, sweat
but is is big enough, i don't know

Black: 120

jjs(4d) g18?

White: 121

sweat(NR) g18 is bad
tom(1k) too small?
jjs(4d) g18 not good, yeah

Black: 122

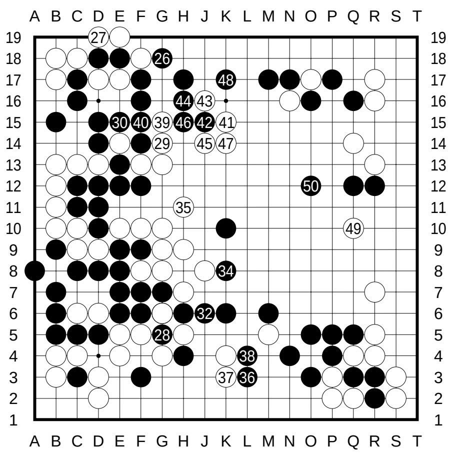
cg(NR) e16 better?

White: 123

monet(7k) w j6, now.

Black: 124

sweat(NR) j5
dp(NR) then g14, then d14.



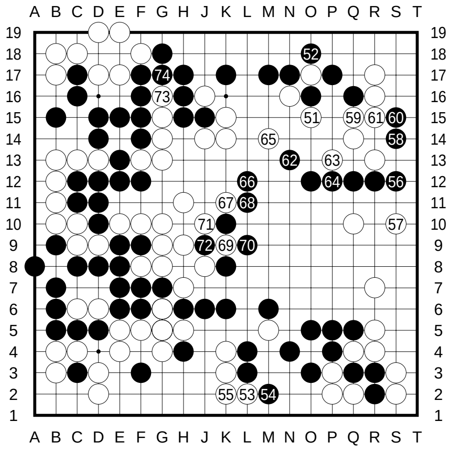
Black 126 – Black 150
131 at (g,6), 133 at 128

Black: 126
dp(NR) j6
szheng(5d) why j6?
sweat(NR) j6!
cg(NR) e16
jjs(4d) can i type all now?
screwup(NR) Yes, I would rather J6.
monet(7k) b c2?
ying(4d) no way j6
screwup(NR) Then attack white at H11.
sweat(NR) i would have j5 instead of d14
White: 129
tom(1k) jjs is 5p!
jjs(4d) c2 too small?
Black: 130
jjs(4d) no,
b had d14
White: 131
dp(NR) g18 ok, only because there was d14.
White: 133
jjs(4d) yeah, dp, that was waht i menat
Black: 134
szheng(5d) l4?
Rin(4d) h11
sweat(NR) h11
ying(4d) h11?
dp(NR) something around l14
REM(4k) Hey, H11 is the move I suggested a while back, right?
White: 135
szheng(5d) b has to defend n6 first
dp(NR) well, i don't know.. might as well h11
sweat(NR) ok then not h11
Black: 136
REM(4k) Oh darn, white got there first.
szheng(5d) q8?
jjs(4d) j12?
tom(1k) w j10 maybe problem for b h11
stone(NR) lost on time?
dp(NR) gees, this IS a h2.
REM(4k) Yup, black ran out of time.
sweat(NR) no black has time
jjs(4d) tell them to add time
REM(4k) kibitz It would seem if black plays around h11, then k10 helps wall off moyo.
White: 137
szheng(5d) so b defend first and reduce w's territory
shaw(4) w is leading in territory
chihyehc(6k) how do you think now? sweat ? last time I've seen you beat lyu. :)
Black: 138
sweat(NR) huhh?
White: 139
chihyehc(6k) last time I've seen lyu beaten by you, huh?
Black: 140
sweat(NR) what about it?
i don't get you
White: 141
szheng(5d) i like g15
chihyehc(6k) in that game both territories are horrible.....
sweat(NR) which game was that?
jjs(4d) if you say last i saw you beat sheah or someone would clearer?
szheng(5d) now w has all 4 corners
Black: 142
chihyehc(6k) the game lyu resigans.
sweat(NR) which one?
szheng(5d) seems, w easy
csp(20k) whereis lyu now?
chihyehc(6k) you mean lyu has been defeated by you several times? :)
szheng(5d) of course chi6d
sweat(NR) it's just that i don't remember how the specific game you have in mind went
szheng(5d) i meant chi6k
csp(20k) seems chihyehc6k is not familar with sweat :)
White: 143
REM(4k) I count white 15 points ahead on board, not counting center and top edge.
yitao(5d) w is actually not bad now
screwup(NR) I feel maybe J13 first.
jjs(4d) b attacks h11 group, the only chance?
dp(NR) count the top territory for b. it is b's
Black: 144
szheng(5d) b q8 will have somethig
Black: 146
yitao(5d) f16 group not alive yet
White: 149
jjs(4d) q10?
screwup(NR) My feeling is that black is losing.
sweat(NR) i think it is very close
dp(NR) i think that screwup can say that. and i agree with him
sweat(NR) but jiang has the edge because he is stronger

szheng(5d) i think w easy
sweat(NR) go jiang!

Black: 150

jjs(4d) why stronger can have the edge?
yitao(5d) now only half of the game, w will gain more later
jjs(4d) ha, my move
szheng(5d) b has to fight hard to win
kass(5d) sweat, before you were doubting this was jiang :)



White 151 – White 175
175 at 169

White: 151

jjs(4d) i am doubting both of them

Black: 152

sweat(NR) white is stronger. and if a person who is stronger plays someone who is weaker in a real close game chances are that the stronger player will win!
szheng(5d) b aiming at g10 group

White: 153

dp(NR) w is in a definite lead now. i think.

Black: 154

ying(4d) it's pitty can't w o18 first
szheng(5d) how big is l2?
REM(4k) After W–Q10: White now has 3 more on right edge, ahead by 12.

White: 155

dp(NR) i would say the same thing if this were a no handicap game, given that it is h2...
jjs(4d) guess more than 12 pts?

Black: 156

sweat(NR) if o18, it will be a lose

White: 157

szheng(5d) s12 also good
sweat(NR) s12 good move i think
chihyehc(6k) why? :(
szheng(5d) one stone, two birds

White: 159

REM(4k) S12 maia for monkey jump either way.
dp(NR) just one little bird. but i think s12 was the biggest at the time.
chihyehc(6k) thanks u all. :)
REM(4k) I mean miai.

Black: 160

jjs(4d) w can only make 2 eyes

Black: 162

sweat(NR) now ic why l2 is very big!
chihyehc(6k) why? :(
szheng(5d) because of j5? sweat
jjs(4d) because of n6?
dp(NR) i thought it was because of j5. but i wasn't sure that was big enough.
sweat(NR) if not l2, black gets j2 sente!
REM(4k) White gained 2 points lower–rt, lost 8 upper–rt if he lives, ahead by 6.
jjs(4d) n14 ?
dp(NR) wow. sweat is right. thanks.
REM(4k) Yeah, Blk–N14 would make some territory in center, enough to win game.

White: 163

REM(4k) Yeah, N13 works too, black might win.
ying(4d) bl need 15 pts in center
REM(4k) White M15 now?
dp(NR) how did you get 15?
jjs(4d) m15?
csp(20k) why only 39 left?
ying(4d) by counting

Black: 164

yitao(5d) h2 would be another choice for b if no l2

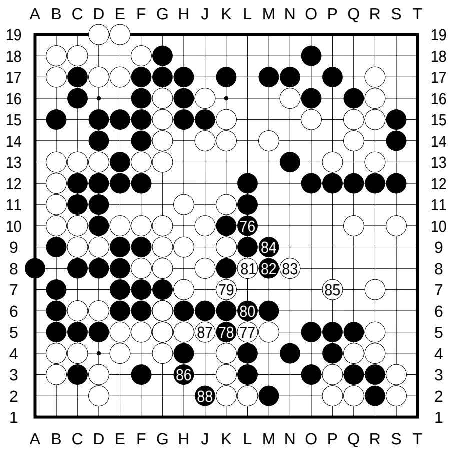
Black: 166

jjs(4d) p9?
szheng(5d) q8 still there
dp(NR) look at m14 9p move
phys64(2) n10
szheng(5d) and p13 is usful now
stone(NR) K12 by B?
monet(7k) b is losing?
dp(NR) b needs about 10 points there. let's see...
jjs(4d) zhuge is no longer here?
sweat(NR) he was gone for a while
stone(NR) nobody can login now, it's locked
yitao(5d) k12 is good
REM(4k) Black J12 now, threaten to cut, thus build center moyo on sente?
sweat(NR) really?

White: 167

jjs(4d) so we are lucky
sweat(NR) it's locked?
stone(NR) try to log in again, sweat!
REM(4k) I don't like black's last move L12, too wishy washy for me.
dp(NR) k11
sweat(NR) why do you want me to not be able to get back in? stone?
l5?
stone(NR) I mean try to log in with another name
tb(1d) how can you lock the net?
jjs(4d) i tried, does not work!

stone(NR) I guess tweet did
dp(NR) i wouldn't play L5
sweat(NR) i can't i'm using a pc
but isn't white group alredy alive?
stone(NR) ok, I tried, it said the server is full (locked)
REM(4k) L12 wasn't sente, so now white can erase
most of the center moyo.
tb(1d) who did that?
monet(7k) w k11?
dp(NR) isn't thre a cut left still around g12?
REM(4k) White N9 now should be sufficient to erase
center moyo.
sweat(NR) sorry i didn't see j12!
tom(1k) h14 for b?
sweat(NR) you are right dp! :)
Black: 168
sweat(NR) once again!
White: 169
dp(NR) only in part. i only saw the little cut
against the four stones. stupid.
monet(7k) my nove once again.
yitao(5d) o10
dp(NR) congratulations. monet.
tom(1k) !monet!
Black: 170
REM(4k) Yup, monet guessed white K11, horay!
White: 171
monet(7k) thanx :)
screwup(NR) Monet 9p is borned here. :)
White: 173
sweat(NR) monet is not a 7kyu!?!
Black: 174
jjs(4d) was born 500 years ago
monet(7k) :) still sort of
White: 175
stone(NR) he will grow up to become a 9p faster than
Cho CHikun



Black 176 – Black 188

Black: 176
monet(7k) not in the same profession
dp(NR) l10
White: 177
sweat(NR) how old are you monet?
REM(4k) This ko should be fun, white threatens
center moyo, black threatens UL group.
jjs(4d) k7
sweat(NR) you are a young kid?
dp(NR) p7
monet(7k) no personal information available :)
stone(NR) monet is only 10 years old
sweat(NR) k7
really?
jjs(4d) k7, w has l5 too later?
15k(15k) yes
stone(NR) ask him
Black: 178
jjs(4d) oops
dp(NR) sweat's dream comes true. :–)
sweat(NR) hooray!
jjs(4d) which bldg r u in, dp?
sweat(NR) but i think k7 first
dp(NR) well.. i think l5 first.
eug–soo–ta–jin
White: 179
dp(NR) eug=eung
jjs(4d) where is that?
Black: 180
sweat(NR) eun–soo–ta–gin that is
szheng(5d) w k7, b can l7
Black: 184
szheng(5d) wow
sliao(NR) w is winning now
White: 185
stone(NR) we should salute to dol and xiaoqian, they
r still playing!
tom(1k) just quit
REM(4k) White gained about four points in center,
so now black needs about 12
screwup(NR) who
REM(4k) in center to win, and it doesn't look like he
can get it. White win?
jjs(4d) p7?
yitao(5d) why not o10?
sliao(NR) p8?
stone(NR) K12?
15k(15k) j5 :)
jinju(NR) no pro game today?
tom(1k) this is it!
kathy(25k) finally, i log on!!!!!
screwup(NR) Congratulations!
sweat(NR) they unlocked it?
jinju(NR) you too kathy?
REM(4k) I recounted: White ahead by 12, minus
