Bugs! Bugs?

Future The Future!!

1.2 About UnPack Master

UnPack Master Is To Make Unpacking Files Much Easier, So You Don't Need To Know How The Commands Go.

UnPack Master Was Created By **Paul Bray** Using E.

UnPack Master Uses The EasyGUI Module That's Why UnPack Master File Size Is So Large.

UnPack Master Was Created On An A1200 With Workbench 3.1, 170MB HD And 10MB Of Ram (2MB Of Chip, 8MB Of Fast).

1.3 Legal Stuff

UnPack Master Is Provided "AS-IS". There Is No Type Of Warranty If You Are Using UnPack Master.

Use At Your Own RISK!

You Can Contact Me At My **Address**

1.4 Shareware

UPM Is Shareware, Some Things Are Disabled In The Shareware Version.

If You Wish To Have The Full Version Send:

- * AUS\$ 5 (Or Equivalent)
- * Your Name And Address
- * A 3.5" Disk
- * Write The Programs Name And Version Number Where I Would Be Able To See It.

And Send It To **Me** .

Its Up To You How You Get The Money To Me.

- * Warning: I Cannot Take Responsibility If You Send Cash By Mail.

1.5 What UnPack Master Requires

- * Needs Workbench 2.04 or Higher
- * Needs Reqtools.library Version 37 or Higher

Optional:

- * LZX (Not Available In The Shareware Version)
- * UNLZX
- * LHA (Not Available In The Shareware Version)
- * DMS

Note: If You Are Missing One Or More Of These You Can Not Use Them In UnPack Master.

1.6 Using it

It Can Be Started From WB or CLI.

All You Need To Do Is Select The Source Then The Destination.

Select Which Type Of UnPacker Then Press Go!

- * Note: If You Start It From The Cli Then You Can Get The Messages From The UnPackers.

1.7 History

Version 1.0:

- * Uses Reqtools.library
- * Uses Two File Requesters
- * Supports DMS
- * Uses EasyRequestArgs Instead Of WriteF()
- * Some Small Changes

Version 0.4:

- * First Public Release
-

1.8 Bugs!?

No Bugs Have Been Found.

If You Find Any Bugs Could You Send The Details Of That Bug To [Me](#) .
