

Trial Use

Java Script It! allows users 10 free trial uses without registration. This means that you have access to all of Java Script It!'s applications for the first 10 launches. Once you reach your 11th use, 8 of the 12 applications within the program become disabled until you register your copy and receive a code to unlock it. Of course to avoid all this inconvenience, you can register as soon as you determine Java Script It! is useful for you.

The 8 applications that become disabled upon 11th use are:

- Animation
- Combo Links
- Confirm
- Form Verify
- Graphic Rollovers
- Open Window
- Slide Show Maker
- Working Buttons

You should try out the above 8 applications first since they will be disabled after 10 trial uses. Plus they are the best and most useful applications.
