Thanks for trying out this shareware version of Thy Dragon!

I hope you have enjoyed playing this new updated version, which is much more fun than the last version was don't you agree?

Any comments are welcome!

Send them E-Mail: tipstir@aol.com

Remember you can use the ORDRM\_94.TXT to register this game or otherwise just use a plain paper and pen to write down what you want!

Btw don't forget to tell which game you want or I'll have to give you a call on the telephone!

Story Plot and Game Story:

THY DRAGON, you must save the young and beautiful princess from the army of evil green big fire breathing Dragons. In this new updated version, you now play the game under the red and evil mountains where the dark and evil Dragon live. Here you'll also see that our fair young princess is being caged like a bird and hanging from the ceiling of the underground cave. Lucky for you that the caves under ground have light torches so you can see what the heck your doing!

## PICTURE NOT AVAILABLE IN THIS VERSION This is an example of what your new scoring board will look like!

Note: The middle picture will change over when you click on Play or Stop the game.

The new main menu line will look like this; PLAY
PAUSE (PAUSED)
SHH!

MENU
ABOUT

## IN THIS VERSION SEE "MENU"

Note: To Explain what each menu line does!

## PICTURE NOT AVAILABLE IN THIS VERSION

Note: That this game uses both mouse buttons even if you have switched them around you can still use them.

PICTURE NOT AVAILBLE IN THIS VERSION Note: Picture display will vary as seen here!

This version only has the following; Timer SET to only 15 seconds, Level Control SET to Shareware Mode

The full version gives you the max in Time minutes and seconds any level of play from very easy, easy, normal, hard, very hard

This game features Expanded Continuous Multimedia Sound Effects. These sounds will play continuous throughout the game. When you click on just about everything will soundoff with a different sound effect or voice. When you pause the game you won't hear any sound effects.

9 Wave files that are needed and comes with this game as follows;

Clear.wav Reset.wav Dragon.wav Dragon1.wav Sword2.wav Swrd.wav Tail.wav Thanku.wav Program files are;

DRAGON.EXE, main game program DRAGON.HLP, this online help BWCC.DLL, must be used with this game

Other files that come with this game;

WIN\_A94.WRI, installation and updated info about this game WIN\_A94.TXT, installation and updated info about this game ORDRM\_94.TXT, order form, specials and current games in 1994 & 1993

VENDOR.EXE, For Vendor, BBS Operator, Sysop, Shareware Retailer, etc... Readme file just type or click on this file in dos or from the File Manager.

Trouble Shooting......in the Shareware Version.

Should this game speed faster with the objects flying by on your 486DX2 66 or higher this is normal for this type of system and your playing in the very hard mode. The level mode is automatically set in the shareware version by the author so on a slow system the game will be slow! (very easy)

In the registered version you won't have this problem since you will be able to control this speed to a slower pace or to a super fast pace.

4 megs only, increase your Windows swap file to 11,264 kb you can also try a temp swap file first or go for a perm swap. With 8 or more megs you won't have to change any settings. Note: Do this if you should experence any trouble using this with 4 megs.

For the sound effects side you can use a sound card for the best results or you can use your PC speaker using the MS Speaker.drv To get this file you'll need to download SPEAKER.EXE from the MS BBS or your local BBS or online services.

Anyother questions you can contact me the author at [407] 487-7572 or E-Mail me at tipstir@aol.com or if you prefer to write to me at;

Albert C. Ashton 19395 Liberty Rd Boca Raton, FL 33434-2644
