Chapter 1

Epson

1.1 main

```
The Epson scanner software works only with the Retina Graphic ↔  
board.  
© 1995 by C Gerrist, Holland.
```

This programm is shareware.

```
This is a unregistered version of the software.  
It is not ready but it is a beta version so you  
can see how fast the scanner works with scsi and  
how it works in 24 bit on the Retina. I made this  
software so I can use this scanner.
```

```
*** I use a pretty big screen 1024 x 768 ***
```

```
*** Use cycle 2 menu, it is pretty handy ***
```

```
*** I add a picture with a 24 bit scan ***
```

```

Main

1.3 Installation

Installation

=====

Copy the software on your harddisk

With icon-information you can set the unit number.
Default is unit 3.

index

1.4 Buttons

Buttons

=====

Save	Save a picture in 24 bit
Cancel	Cancel the operation (not 100 %) soon
Preview	A quick 256 gray scan.
Scan	Scan the image 24 bit. It scans the area you have select.
Dpi	Set the dpi of the scanner. It sets the X and Y dpi. Maybe I spit this. (use cycle to menu). If you go to a lower DPI you must reset de area Reste button. else you get a scsi error (sense). DPI go from 50 to 600 dpi.
Zoom	Same as dpi. You can set 50 to 200 zoom.

	It set X and Y. Maybe I spit this.
Set	You can draw a rectangle on the screen. This rectangle is the scanned area. If you set X lager than the max area you get a sense error. (Working on it)
Reset	Set the area to the max resolution.
x1,y1,x2,y2	This is the scanned area. You can edit manuel.
Cycle button 256/24	Yet only 24 bit. Soon it wil work.
Sharp	You can set a sharper image or not.
Speed	Hi speed scan or slow speed.
Gamma correction.	You can set the gammacorrection insite the scanner.
Color	It only works in Colormode. Soon you can drop R, G or B and you can scan monochrome.
Bright	This set a brighter image or not.
Halftone	You can set some dither modes. This does not work in 24 bit.
ColorCorrection	If you scan to a printer than you can correct the color. (not suported)

1.5 To Do

To Do

=====

This is a beta release. I must work hard on it. There are some nesty bugs but I work on it. If you have no other scanner software you can scan pretty well with it.

Todo

monochrome, R G B, and 2 to 16 bit scans.

Better area set.

Spit DPI and ZOOM

A ESC or AGA version. Not hight on my list.
