**To use this macro**, simply run it from the Tools, Macro, Run menu. You can also copy the toolbar that comes with this template to your copy of Word. You can also add it to one of your menus using Tools, Customize above. Copying the toolbar can be done using Tools, Macro, Organizer:

First, click on the Toolbars tab. In the left box, make sure that this template, PAMMAF(.dot) is showing, and in the right, make sure that the template, NORMAL(.dot), is showing. In the PAMMAF Box, highlight the Multimedia toolbar. Then choose copy. Macros can also be copied in the same manner. Finally, click on Close at the bottom. Now start a new document, and choose View, Toolbars, and put an X in the check box in the toolbar labeled Multimedia. For more help consult your manual.

**Some features of the macro:** you can double click on the selection and it will play. You can type any file type, not just the five listed, and it will play. This assumes that you have the proper drivers and extensions installed. You must type the full path, name, and extension of the file you wish to play, or simply click on the file type, and they will be listed for you. Use the on-line instructions. The path may be excluded if the file is listed in a directory in the PATH= statement in your autoexec.bat.

NOTE: It may take some time for larger multimedia files (especially \*.AVI) to load. Be patient.

UPON REGISTERING: You will receive information on how to remove annoying messages, add to the file types for example, QuickTime, or VideoBlaster extensions, and fix any problems in the macro. The registration is only \$10. Please, Please, help me through college with your support.
