

ANT_HTML.DOT is a template designed to work within Word for Windows 6.0 to facilitate the creation of hypertext documents. HTML codes can be inserted into any new or previously prepared Word document or any ASCII document.

To install the ANT, copy ANT_HTML.DOT to the Winword \ Template directory.

The Ant Instruction Guide may be found in ANT.HTM. You may wish to create a directory for the guide and it's gifs. (There are many gif files depicting toolbar tools so, for faster loading, you can turn "Display Inline Images" off in your HTML browser if you wish.)
