

Introduction

FracView displays the Mandelbrot set and allows the user to zoom in on a region of interest.

Required Hardware and Software

Microsoft Windows 3.1 or later. An 8x87 compatible coprocessor is highly recommended.

Installing the Program

Using the MS-DOS shell, or the Windows File Manager, create a subdirectory for the program. For example:

```
MKDIR C:\FRACVIEW
```

Then copy all files from the distribution disk into the subdirectory. For example:

```
COPY A:\*.* C:\FRACVIEW
```

The program is made up of the following files: FRACVIEW.EXE, FRACVIEW.HLP, and USERS_GD.WRI.

Using the Windows Program Manager, select the File menu and the New submenu. Then select the Personal Program Group button and the OK button. Enter FracView in the Description field and select the OK button.

Select the File menu and the New submenu again. This time, select the Program Item button and the OK button. Enter FracView in the Description field, and enter the location of the program in the Command Line field, for example:

```
C:\FRACVIEW\FRACVIEW.EXE
```

Select the OK button.

The program is now installed.

Running the Program

After starting the program, if you need further instructions, press F1 for help.

Distribution and Payment

FracView may be freely copied without cost, provided it is not changed in any way. If you find the program useful, please send \$7.50 to:
