Description:

Phone Works is a flexible phone utility that organizes numbers in a menu structure. The menu structure is very easy to set up. Using PhoneWorks you can automate voice response systems like Bank by Phone, Phone Mail, and Stock Quotes eliminating the need to memorize all those different phone commands.

System Requirements:

Phone Works runs under Windows 3.1, VBRUN300.DLL and a modem that supports the HAYES AT command set. With a modem speaker, you will be able to hear your voice response system without picking up your telephone.

Installation:

Since you are reading this, I assume that you have unzipped the PhoWks archive. The rest of the installation is very easy.

Using the File Manager

Mouse: Double click on INSTALL.EXE.

Keyboard: Select Run from the File menu and enter B:\INSTALL,
where B:\ is the location of your unzipped Unzipped PhoneWorks files.

Using Program Manager

Keyboard: Select Run from the File menu and enter B:\INSTALL,
where B:\ is the location of your unzipped Unzipped Phone Works files.

Uninstalling:

Delete the directory where PhoneWorks is installed.
Delete PHOWKS.INI from the WINDOWS/SYSTEM directory.
