HOW TO RUN TALKEYS

1. Start the application you wish to use TALKEYS with.
2. Go to Program Manager and double-click on the TALKEYS icon to run it. Or double-click on TALKEYS.EXE in File Manager to run it.
3. A small green bar with the word "Talkeys" appears. Move the bar to any out-of-the-way location on your screen by clicking down with the left mouse button on the Titlebar (and while still holding the mouse button down) "dragging" the bar to another location. Talkeys is designed to stay on top - so it will not normally disappear under another application's window.
4. Now click on the application window which you wish to use with Talkeys (to "tell" Talkeys which application you wish to use it with) and then click back on the Talkeys bar.
5. Now start typing at the keyboard. TALKEYS will speak the keys as they are typed and type the letters into your application at the same time.
6. Make sure that TALKEYS is the ACTIVE application at all times that you wish it to speak out the keys you are typing. If TALKEYS is not active you will not hear the keys you are typing. If you click on the destination application, to edit something or for whatever reason, click back on the green Talkeys bar to make TALKEYS active again. You will know when TALKEYS is active when Talkeys titlebar is highlighted (colored - usually blue). Plus you will be able to hear the keys being typed.

HOW TO EXIT TALKEYS

Double-click on the green Talkeys bar to exit Talkeys.

WHERE TO SEND QUESTIONS, COMMENTS AND BUG REPORTS

Send any questions, comments, suggestions and bug reports via E-Mail to
Screen Name: COMPUNIK on America Online.

WHERE TO SEND REGISTRATION

If you like and use this software regularly, please register it within 30 days of first using it. Registration is US \$ 10 only. Send your Name, Address, Screen Name, Name of program and check for US \$10.00 (payable to Arun Sethi) to:

A. Sethi
Compunik Creations
8761 Whispering Oaks Ct.
Franklin, WI 53132

ACKNOWLEDGEMENT

I would like to thank CAdventure (cadventure@aol.com) of Cerebral Adventures for his help in preparing the almost 100 sound files that represent the letters and symbols on the keyboard.
