(You will need to have Lynch2.TTF loaded to properly view this file)

Thanks for downloading these fonts. Both of them are a very good representation of my printing and almost fooled a few people. They thought that what they were seeing was handwritten and not printed on my laser. They only thing that clued them in is that it was too evenly spaced. (As you can see my handwriting is nothing short of atrocious.)

If you would like to have your own handwriting converted into a TrueType™, I will convert it for you. There are two 1-2-3™ files and .BMP files in this package, used the one called CHARMAP.* for your examples, and CHARGRID.* to fill it out (use the files that best suits your system), also fill in the information in the ORDER.FRM, so I can mail or E-mail the completed font back to you. After you do this mail them, with a check or money order for $25.00 to:

        Nick A. Lynch
        1001 Stonewall Drive
        San Angelo TX 76905-8139
        (915) 651-6311

Give me about 2 - 6 weeks to process your order, and be sure you include your E-Mail address, as this will speed up processing. If for any reason, within the first 30 days after delivery you are unhappy with the font, I will refund your money. What I will do is hold your check or M.O. for 30 days or until I hear from you that either you are happy with the font, or unhappy with it. If you are unhappy I will return your check or M.O. to you.

Once again, Thanks for downloading these fonts, and watch for a few more, my wife wants me to do hers too. ;)
