Tricks/Hints

- 1) To get the blood code, at the grey screen which talks about codes, hit: A,B,A,C,A,B,B. If done correctly, the text will turn red, you will hear "Get over here!", and the words "Now entering Kombat" will appear.
- 2) To access the cheat mode, at the Game start/options screen hit: Down, Up, Left, Left, A, Right, Down. (acronym- D.U.L.L.A.R.D.)
- 3) To fight Reptile, at the pit get a double flawless and perform the Fatality. You cannot use Block at all (this excludes all moves/fatalitys that use block!) IF you beat him, and perform your fatality, you'll get 10,000,000 points.
- 4) To get to Reptilian Sonya, put in the DULLARD code and flag 0,2 & 3. Set the plan base to three. Give yourself three credits in the option screen. Fight up to the 2nd endurance. Keep dying until you're fighting at the pit, perform a double flawless and the fatality. (once again, no

block!) You'll fight reptile, then Sonya.
