Installing PopCal 5.5

(1) Run INSTALL.EXE from the distribution archive you've downloaded, or. . .

(2) Copy all the files from your distribution disk into a common subdirectory. Run Windows' Program Manager and click on PopCal.Exe to put the program icon into your chosen group.

PopCal should now be installed

Table of Contents

Running PopCal

Configuring PopCal

Running PopCal

Click on the program icon from Program Manager

PopCal will first popup in the lower left hand corner of your screen. If you move the calendar to a more convenient place, PopCal will remember its position, saving the coordinates in POPCAL.INI, found in your Windows directory after PopCal is once opened and closed.

Double click on a date and PopCal will pop the day and date into your Windows clipboard. See Configuring PopCal on show to change colors.

[Configuring PopCal](#)

Configuring PopCal

from the main SetUp Menu

Setup will take you to this color-configuration and date-format menu.

Watch PopCal as you click on color buttons. When you've decided on the color scheme you like, click on Exit and PopCal will save these colors for the next session. Colors can be changed as frequently as you wish.
