Copyright 1995, TRIUS, Inc.
P.O. BOX 249, North Andover, MA 01845-0249

Orders ONLY!: 800-GO-TRIUS (800-468-7487)
Info: 508-794-9377￼￼FAX: 508-688-6312￼￼BBS: 508-794-0762

This READ.ME file contains information about DRAFT Choice for Windows that did not make it to the printed manual of Ver. 2.00, and gives brief installation instructions.

Please READ THIS FILE THOROUGHLY! It contains very important information, and reading it now will probably save you time and trouble later on!

Shareware is NOT Freeware!

Evaluate the shareware copy of DRAFT Choice for 30-days and give copies to your friends for evaluation. If, after the 30 days, you continue to use the program, then you need to purchase the license to use the program (register it) by sending us the registration/order form included on the disk or by calling 800-468-7487 (Orders Only!). You will receive the Latest version, Printed manual, 90-day free Technical Phone Support,￼BBS Technical Support,￼Newsletter, and Reduced price Upgrades.

In addition to that,￼the 'UNREGISTERED COPY' message will be eliminated from the screen and the printout.   And, of course, it will get you the legal license to use the software beyond the 30-day evaluation period.

If you purchased a Disk, without a printed, bound, user's manual, or you downloaded a copy from a￼BBS or other service, or you got a copy of DRAFT Choice for Windows from a￼CD-ROM, or the program was pre-loaded on your computer, then you do not have a licensed copy of the program, you only have a 30-day evaluation shareware copy. You need to purchase a registered copy for use after the 30-day evaluation!

Support new developments in DRAFT Choice for Windows, register your copy today!

Thank you for your support!

<u>Minimum Hardware Requirements</u>

- 386/486/Pentium Running Windows 3.1
- EGA or better video capabilities (VGA, SVGA)
- 3.5" Drive & Hard Disk

<u>Installation</u>

Make sure you are running Windows 3.1 and the Program Manager is currently on the screen.

Place the DCWIN diskette in your drive. From windows Program Manager, select File, Run and when the cursor is placed in the Command Line Box, type in,

    d:\SETUP.EXE

where d is the drive where the DCWIN disk resides. For example, if the DCWIN disk is in drive A, then type A:\SETUP.EXE and press [ENTER].   If the DCWIN disk is in drive B, then type B:\ SETUP.EXE and press [ENTER].   (Instead of ENTER, you may click on the OK button).

The DCWIN Installation screen will appear where prompting you to enter a destination drive and directory (where you want the program installed). Note the option to create the DCWIN group (in Program Manager) is toggled ON. We recommend that you allow the Installation program to create the group, but if you are quite familiar with Windows, you may toggle that option OFF and create the group yourself.

<u>Ordering Information</u>
Remember that a shareware copy is an EVALUATION copy that you can use for up to 30 days. If you continue to use the program, Registration and payment are Required! You may register using the order form in the ORDER.WRI file, or by calling TRIUS, Inc. and charging your purchase on your credit card. We suggest that you call, since prices are subject to change without notice.

You may also order your copy on-line by calling our TRIUS Support BBS at (508) 794-0762, [Settings 2400 - 14,400,N,8,1 - 24 hrs].

If you live outside the US and Canada you may want to contact TRIUS, Inc. for a dealer in your country. Purchasing through these dealers can save you the delay and inconvenience which may be involved in dealing with currency conversions and international shipping and in many cases will provide you with faster technical support.

Last Minute Mods in v2.00

-- While the Layer Dialog box is open, the color of each layer is displayed in a small square to the left of the Layer number. Furthermore, while in the same dialog box,clicking on the larger color box on the current layer will open a secondary dialog box that will permint you to change the current layer color.

-- While performing a File operation (Load, Save, etc.), highlighting a file name and clicking the left mouse button once displays size, date and time of the highlighted file.

End.-
