To install your guest license copy of TALK*Show*, simply Run *d*:\TSHOWGST.EXE from Windows Program Manager or File Manager where *d* is the floppy drive with the guest license. Then follow the on-screen prompts.

The Quick Tutorial and Help files may be downloaded from our BBS at 415-254-0284. The file names are QTUTOR.ZIP and TSHOWHLP.ZIP. These files are not part of the guest license due to the size of the TSHOWGST.EXE file. The BBS can handle speeds up to 28.8K baud.

After you have reviewed the Quick Tutorial and set up your modem in the Conference Modem Setup... menu, please call me at 415-254-9000 x3006 for an online demo. Please be aware that you will need two phone lines and a minimum modem speed of 9600 baud, although 14.4K or better is recommended.

Rich Gribi
Senior Sales Representative

TALK*Show*, the leader in desktop document conferencing software.
