1.2   Introduction

Introduction

MuiscInGUI is an GUI for the mpeg-audio encoder MusicIn .

MusicIn only supports cli-arguments. It is not very comfortable - too many parameters. So I decided to write this little GUI to make the live easyer for me.

1.3   Copyright

Copyright

MuisicInGUI is Freeware.

It is only allowed to copy the whole archive (programfile + this guide).

Use it on your own risk

1.4 Requirements

Requirements

The GUI needs at least:

- MUI 3.3

- Kickstart 2.0 (V37) or better

- MusicIn

Note: MusicIn requires an 68030/40/60 with FPU

1.5 MagicUserInterface

This application uses

MUI - MagicUserInterface

(c) Copyright 1993-97 by Stefan Stuntz

MUI is a system to generate and maintain graphical user interfaces. With

the aid of a preferences program, the user of an application has the

ability to customize the outfit according to his personal taste.

MUI is distributed as shareware. To obtain a complete package containing

lots of examples and more information about registration please look for

a file called "muiXXusr.lha" (XX means the latest version number) on

your local bulletin boards or on public domain disks.

If you want to register directly, feel free to send

DM 30.- or US$ 20.-

to

1.6 Start

Installation

Just copy the file MusicInGUI into your MusicIn-directory.

If you want to create an own dir for the GUI you have to set the tooltypes.

Tooltypes

Supported tooltypes:

(1) MDir

Directory where MusicIn can be found. Default is 'PROGDIR:'

(2) MName

Name of the MusicIn mainprogram. Default is 'MusicIn040.FPU'

(3) Priority

Here you can set the taskpriority of MusicIn. The GUI starts MusicIn at this priority.

The same arguments are also supported if you start the GUI from cli.

1.7 Usage

Usage

I want to give here a detailed description about the options of MusicIn. Please read the file MusicIn.doc which can be found in the MusicInpackage.

You can select the name of the file which you want to encode (input) via drag&drop. A possible outputfilename will generated automatically.

Save Prefs saves the actual setting of the GUI.

The Start button starts MusicIn. (You may have to set the name and path in the tooltypes . Default: PROGDIR:MusicIn040.FPU)

1.8 History

History

V1.2 18.04.1997

- fixed enforcer hit(s)

V1.1 11.04.1997

- new tooltype priority

V1.0

- first public release
