See also…

Sometimes when you read a page in the DynRisk-Help file, you may need to learn more about a related topic. To assist you in this process, some of the pages in the DynRisk-Help file are "hot-linked" to each other. For those pages where this is implemented, you can click the "See also…"-button or the "esc" key to go to a related topic.

Note however, that not all pages support this feature.

Go to start

The "Start" button takes you to the very first topic in the DynRisk-Help file.
