

here are three ways to do this Tutorial:

1• Print this page and follow along.

Click on the Goto Button to print this page

2• Launch InternetMemory and switch back and forth.

3• Use the "Tutorials" Apple Guide from within IM.

The Apple Guide files are available from the Help menu, found

immediately to the right of the InternetMemory menu. They are only

listed when IM is the front most application.

If it isn't already running, launch the InternetMemory Application.

1• Open the address book that came with InternetMemory
It's called "CircleDream Software Addresses", and should be found with the other files installed.

2• Open the "CircleDream Software" folder
Click on the arrow next to the folder to open it.

3• Click on the "New Address..." button
It's the third button in the second section. A dialog will appear, asking you to name your new address.

- Set the Address Type to "Email"

The "Type" pop-up menu contains a list of the different address types that InternetMemory supports.

- 5• Name the Address "Feedback"

You can use this entry later if you have any problems with our software.

- 6• Enter the feedback address: "feedback@circledream.com"

You should use this address to send us suggestions, comments or questions.

- 7• Click on the "Add" button

- 8• Repeat the same procedure, adding our "Technical Support" address (help@circledream.com)

You should use this address to when you need technical support with any of our products. You will need to have a registered copy of InternetMemory to complete this step! If you haven't registered yet, skip to step 9.

- 9• Select both Addresses

Hold down the shift key to do multiple selections.

- 10• Drag the Addresses into the "CircleDream Software" folder

You can click on the arrow next to the folder to see what's inside it.

- 11• Select your Address Book and choose "Save" (⌘S) from the "File" menu

Save the address book as "My Address Book" and remember where you put it, as you'll need it in later Tutorials.

- 12• With the Address Book still selected, choose "Close" (⌘W) from the "File" menu

Summary

In this Tutorial, you have:

- Created your very own Address Book
- Entered two key CDS addresses: Technical Support and Feedback
- Saved an Address Book
- Closed an Address Book

Tutorial 2: Encryption

Click on the Goto Button to proceed to Tutorial 2.
