

Index to the ValueFax User's Guide

This Index will help you find topics of interest in the ValueFax User's Guide. Index terms are organized alphabetically from "A" to "Z" and also sorted within the letter groups. For letters with no index terms, we have supplied the phrase "No entries." Note that there is some cross-referencing, where the Index states "see ..." or "see also" Common abbreviations are used for brevity, including WRT ("with respect to"), & ("and"), and w/o ("without"). Different text will print on different pages, depending on your computer and printer. For this reason, the Index always points you to a Chapter or Chapter & Section rather than the page number.

- A -

Adding a Phone Book Entry: Chapter 3, Section 3.1
Adobe Illustrator (printing problems): Appendix B, Section B.3
Adtech modems: Chapter 1, Section 1.2
Aiwa modems: Chapter 1, Section 1.2
