_____

Hints

If you get the Tunnel Map, check it to see if there are any rooms you

    haven't been able to get into. There probably is a secret door leading into
    them or you could use an ethereal potion.

You don't need to drop puzzle pieces unless you have more than four.

You can also drop them anywhere you want. If you have some you

know you do not need you can drop them in an out of the way place

so you don't keep running into them. To do this go to where you want
   to drop the piece and hit the Newton key (C is the default). Drag the
   unwanted piece to the botton section of the ArcheoPad and then hit
any
   key (except the space bar) This will drop the piece where you were
   standing.

It's best to know where you are going BEFORE you drink an Ethereal
   Potion.

Transporting to the next level will also stop any poison in your system.

   Sometime backing up, rather than turning,   is a faster way to get an

   enemy in front of you.
