

About this Document

This document must be distributed with any copy of Mystery Box. It explains the differences between the "Demo" version of the program and the "Registered" version. It also explains how Mystery Box can be distributed and the limitations on distribution. Information regarding registration of Mystery Box along with a registration form is included toward the end of this document.

Please Note: This document was prepared with 12,14 and 18 point Helvetica font.

About Mystery Box Version 2.0

Mystery Box is distributed under the Shareware system and is not in the Public Domain. Thus this program is Copyright © 1991 Keith Lambert, All Rights Reserved Worldwide.

Mystery Box has been rewritten and many enhancements have been added, and I am now proud to present to you Version 2.0. This version has many new features compared to earlier versions. The most obvious, to those of you with a color Macintosh, is that Mystery Box Version 2.0 now plays in full color. Another new feature is the unique digitized sounds to make the game more fun than ever. There are also several new options in the game and a new, more exciting scoring system. This is all explained in detail in the Online help system.

Version 2.0 is compatible with all Macintoshes running at least System 6.0.2 with 512K of memory. It is also compatible with MultiFinder and System 7.0.

Changes in Version 2.0.1

This version fixed a problem with the program causing a system error when the starting the program after the Shareware trial period elapsed.

Changes in Version 2.0.2

This version now shows the serial number of the program after the Shareware trial period has elapsed.
