

Introduction

utland is an on-line gaming destination for you and your Macintosh. While there, you'll be able to play graphical games with people across the Internet.

Outland's membership fee is \$9.95/month, with no hourly charges. You can try out Outland with no obligation – we don't start billing until you've used Outland for over 5 hours.

We recommend that you read through Chapter 5 of this manual before connecting to Outland. The other chapters relate to the games themselves and can be read later.
