

Playing the Game Cont.

A player may bet more than one chip at a time. To change the amount of each wager enter the number of chips that you wish to place or remove in the small rectangle labeled chips per bet at the bottom of the table. This amount must be between zero and the current stake. If the number is higher than the current stake only the stake amount will be wagered.

A player may increase the stake amount at anytime by selecting the player information item from the Players menu. Here the player may enter the amount by which to increase the stake. There is a limit to the amount of chips of each color the table has. The number of chips left available to the player is displayed in the player information dialog box.

When more than one player is at the table it is possible that two or more players will wager on the same bet. When this occurs the chips are stacked directly on top of one another, with the player selected's chips on the top.
