 OTHERLOBE™ also publishes a more elaborate Numerology program called PRIME™:

PRIME™ is modeled on some of the more arcane theories of Pythagoras. It   is divided into two sections, Personal Numbers and Applications.

Personal Numbers includes:

  • Alpha-Numerics — potential strengths & weaknesses.

  • Personal Eras & Personal Challenges — the #'s that influence the four "sections" of a Subject's life and the challenges or "missions" presented in each.

  • Personal Years, Months & Days — temporary #'s that influence the world around a Subject during these periods (essentially the same as the Temporary # readings in WAKEN™.)

  • Predictions — what to expect in any future year, divided into trimesters.

The Applications section   is divided into:

  • Mates & Partners — analyzes the potential harmonies and conflicts that can affect relationships (romantic, business, teams, etc.)

  • Choosing Names — helps in choosing a Numerologically desirable name for anything from babies to boats.

  • Addresses — analyzes the character of a place.

PRIME™ features:

  • voluminous reports that can be saved to disk and edited with a word-processor.

  • "sets" of names (celebrities, family members, friends, colleagues, etc.).

  • exhaustive on-line help.

• complete manual with background on Numerology and tips on how to approach the readings.

There is an example from a typical PRIME™ session accompanying this program called "Jack Nicholson, July 14, 93". Open the file with WAKEN™ and have a look.
