

About WAKEN™ ...

If you check out your Horoscope in the morning before taking on the world then you're ready for WAKEN™.

You can keep sets of Subject names and data in separate group files. You might have one for family members and another for colleagues at work, school, etc.

Run WAKEN™ at startup to see what your day holds in store. Look over readings for people you live with, work with. If a reading seems timely fax them a copy. Make their day.

- System 7 — put a WAKEN™ alias in your Startup Folder so it'll fill you in automatically at Startup.
- System 6 — make WAKEN™ the startup application (While in the Finder single-click on WAKEN™, choose "Set Startup..." under the "Special" menu then select the radio button that says "Upon startup, automatically open WAKEN™.")
