

Quick Start Guide

Movie Cleaner Pro is powerful, yet simple to use. If you want to jump right in, go for it! Simply drag the Movie Cleaner icon to your hard-drive and double click to launch it. The first time you open Movie CleanerPro, you'll be asked to type in your serial number.

After Movie Cleaner Pro opens, the Easy Settings window will come up. If you are new to video compression, we suggest you follow the instructions given to you by the Movie Expert. If you are familiar with video compression, you can switch to advanced mode by clicking the "Advanced Mode" button under the Movie Expert. Simply configure the various settings and hit "Compress"! You can even save your settings for future use with the "Save" and "Save As..." commands in the Settings menu.

If you need to get your computer back for a while, you can "Suspend" compression at any time — just open the source movie and click on "Resume" to pick up where you left off.

Don't forget to register your copy of Movie Cleaner Pro!

Registered users receive free technical support and notices of future updates. Please fill out completely and mail your registration card, or the registration form in Appendix D. You can also register by stopping by our web site at <http://www.Terran-Int.com>
