What is it?
Replicate will duplicate a sound or envelope to the number of times specified.

How to use it
Selecting Replicate from the menu will bring up a dialog box with Times as it's only parameter.   The default parameter will duplicate the selection ten times.

The Times field can have a range of 1 to 99999999.   If there is not enough memory to replicate the selection the specified number of times, it will do it as many times as memory allows.
