Coops Cursor 1.03

This is my third attempt for shareware.   This will replace your normal boring black cursor with this nice Apple® Icon.   This is the 2nd Coops Cursor out there, the other one was a Star Trek cursor.

This should be compatible with any Mac, I have tested it on my 6200 Performa, and a couple of my friends tried it out too.   If you come across any problems just let me know at coop@netins.net

Disclaimer: If anything is to happen to your Mac while you are using this...well....too bad....because you cannot blame me.   You use this at your own risk.   I have not ever had a problem with it, so I am guessing you won't either.

This is $3 shareware, I don't think that is too much to ask, I am going to need every little dollar I can get to keep making stuff.........please send the $3 to:

Justin Cooper
339 East Main Street, P.O. Box 115
Manly, Iowa   50456

If you like this and want my other shareware stuff I make, just email me and put "SHAREWARE NOTIFY"   for the subject and you will be notified when I make somehting new.

And if you ask nicely I might even send you my new shareware before anyone else gets a chance to even hear about it, just put "SEND IT TO ME" for the subject

And look me up if your ever on IRC, I am either Kryten or Coop on #Hi, #TheGathering, or #Macintosh.

Look for future things from me.......this is just the beginning...I hope.

I Have Made:

Justin's Replacement Icons

Coop's Cursor v1.02 (Star Trek Icon)

Coop's Cursor v1.03 (Apple® Icon)

Coming Soon:

Coop's Cursor v1.04 (Big Bird Icon)

Coop's Cursor v1.05 (Target, Crosshairs....)
